

National Core Indicators
Aging and Disabilities Adult Consumer Survey

2019-2020 Kansas Results

Preface

The State of Kansas has a number of publicly funded long-term services and supports (LTSS) available to older adults and adults with physical disabilities who have significant health care needs. LTSS provide a wide array of health and social supports that enable these individuals to avoid placement in facilities and to live in a setting of their choice. Specifically, the Kansas Department for Health and Environment (KDHE) administers Medicaid funding for LTSS that provides a variety of program options in both facility-based and home and community-based services (HCBS) settings. The Kansas Department for Aging and Disability Services (KDADS) oversees and administers the Medicaid waiver programs. KDADS administers funding from the federal Older Americans Act and State Funding for Senior Care Act Services, making additional supports and services available to help older adults remain in the community of their choice.

Because our population is rapidly becoming older and more diverse, this is a particularly critical time for Kansas to assess the quality and impact of its existing LTSS. An element that cuts across all parts of Kansas' LTSS system is the importance of measuring quality and reporting the results to stakeholders. Participation in the National Core Indicators for Aging and Disabilities (NCI-AD) project continues Kansas' efforts to evaluate the quality of life and quality of services that persons receive. Over the next decade, Kansas will experience a demographic shift that will create new demands for the LTSS system. The findings from NCI-AD are crucial information for Kansas to better understand and support the growing and shifting population.

This report highlights the results for Kansas from its fifth year of NCI-AD Adult Consumer Survey implementation. State departments and planning groups can utilize this information to make improvements in programs and services, and more effectively meet the needs of older adults and adults with physical disabilities who have significant health care needs.

Laura Howard, Secretary
Kansas Department for Aging and Disability Services

List of Abbreviations Used in This Report

AAA – Area Agency on Aging
ADRC – Aging and Disability Resource Center
BI Section – Background Information Section of NCI-AD Adult Consumer Survey
CIL – Center for Independent Living
CPAP – continuous positive airway pressure
FE – Frail Elderly
HCBS – Home and Community-Based Services
HSRI – Human Services Research Institute
KACE – Kansas Adult Care Executives
KDADS – Kansas Department for Aging and Disability Services
LTSS – Long-Term Services and Supports
N – Number of respondents
N/A – not applicable
NASUAD – National Association of States United for Aging and Disabilities
NCI-AD – National Core Indicators for Aging and Disabilities
OAA – Older Americans Act
ODESA – Online Data Entry Survey Application
PACE – Program of All-Inclusive Care for the Elderly
PCA – Personal Care Assistant
PCP – Person-Centered Planning
PD – Physical Disabilities
PERS – Personal Emergency Response System
QMS – Quality Management Strategy
TBI/BI – Traumatic Brain Injury/Brain Injury

Table of Contents

Preface	1
List of Abbreviations Used in This Report.....	3
Table of Contents.....	4
What is NCI-AD?	20
NCI-AD Adult Consumer Survey.....	20
Survey Overview	20
Figure 1. 2019-2020 NCI-AD Domains and Indicators	21
Survey Organization.....	24
NCI-AD in Kansas	26
Sample.....	26
Figure 2. Number of survey-eligible service recipients, number of analyzed surveys, and calculations of margins of error by program.....	28
Survey Process in Kansas	29
Stakeholders	29
Organization of Results	29
Limitations of Report	31
Results	32
Community Participation	32
Graph 1. Percentage of people who are as active in their community as they would like to be.....	33
Graph 2. Percentage of people who are able to do things they enjoy outside of home as much as they want to.....	33
Choice and Control.....	34

Graph 3. Percentage of people who are able to choose their roommate (if in group setting and have roommates)	35
Graph 4. Percentage of people who get up and go to bed when they want to	35
Graph 5. Percentage of people who can eat their meals when they want to.....	36
Graph 6. Percentage of people who are able to furnish and decorate their room however they want to (if in group setting).....	36
Graph 7. Percentage of people who never feel in control of their lives	37
Relationships	38
Graph 8. Percentage of people who are always able to see or talk to friends and family when they want to (if there are friends and family who do not live with person)	39
Satisfaction.....	40
Graph 9. Percentage of people who like where they live	41
Graph 10. Percentage of people who want to live somewhere else	41
Graph 11. Percentage of people who like how they spend their time during the day	42
Graph 12. Percentage of people whose paid support staff change too often	42
Graph 13. Percentage of people whose paid support staff do things the way they want them done	43
Graph 14. Percentage of people whose case manager changes too often.....	43
Graph 15. Percentage of people whose services help them live a better life.....	44
Service Coordination	45
Graph 16. Percentage of people who know whom to contact if they want to make changes to their services	46
Graph 17. Percentage of people who know whom to contact if they have a complaint about their services.....	46
* Very small number of responses	46
Graph 18. Percentage of people whose paid support staff show up and leave when they are supposed to	47
Graph 19. Percentage of people who have an emergency plan in place	47

Graph 20. Percentage of people whose long-term services meet all their current needs and goals.....	48
Graph 21. Percentage of people whose case manager/care coordinator talked to them about services and resources that might help with their unmet needs and goals (if have unmet needs and goals and know they have case manager/care coordinator)..	48
Graph 22. Percentage of people who have a backup plan if their paid support staff do not show up	49
Graph 23. Percentage of people who can reach their case manager/care coordinator when they need to (if know they have case manager/care coordinator)	49
Care Coordination	50
Graph 24. Percentage of people who felt comfortable and supported enough to go home (or where they live) after being discharged from a hospital or rehabilitation facility in the past year	51
Graph 25. Percentage of people who had someone follow up with them after being discharged from a hospital or rehabilitation facility in the past year.....	51
Graph 26. Percentage of people who know how to manage their chronic condition(s)	52
Graph 27. Percentage of people with concerns about falling or being unstable who had somebody talk to them or work with them to reduce the risk	52
Access to Community.....	53
Graph 28. Percentage of people who have transportation when they want to do things outside of their home (non-medical) ..	54
Graph 29. Percentage of people who have transportation to get to medical appointments when they need to	54
Access to Needed Equipment	55
Graph 30. Percentage of people who need grab bars in the bathroom or elsewhere in their home but do not have them	56
Graph 31. Percentage of people who have grab bars in the bathroom or elsewhere in their home but need a replacement.....	56
Graph 32. Percentage of people who need bathroom modifications (other than grab bars) but do not have them.....	57
Graph 33. Percentage of people who have bathroom modifications (other than grab bars) but need a replacement	57
Graph 34. Percentage of people who need a specialized bed but do not have it	58

Graph 35. Percentage of people who have a specialized bed but need a replacement.....	58
Graph 36. Percentage of people who need a ramp or stair lift in or outside the home but do not have it.....	59
Graph 37. Percentage of people who have a ramp or stair lift in or outside the home but need a replacement	59
Graph 38. Percentage of people who need some other home modification but do not have it.....	60
Graph 39. Percentage of people who have some other home modification but need a replacement	60
Graph 40. Percentage of people who need a walker but do not have it	61
Graph 41. Percentage of people who have a walker but need a replacement.....	61
Graph 42. Percentage of people who need a scooter but do not have it	62
Graph 43. Percentage of people who have a scooter but need a replacement	62
Graph 44. Percentage of people who need a wheelchair but do not have it	63
Graph 45. Percentage of people who have a wheelchair but need a replacement.....	63
Graph 46. Percentage of people who need hearing aids but do not have them	64
Graph 47. Percentage of people who have hearing aids but need a replacement.....	64
Graph 48. Percentage of people who need glasses but do not have them	65
Graph 49. Percentage of people who have glasses but need a replacement	65
Graph 50. Percentage of people who need a shower chair but do not have it	66
Graph 51. Percentage of people who have a shower chair but need a replacement.....	66
Graph 52. Percentage of people who need a personal emergency response system but do not have it	67
Graph 53. Percentage of people who have a personal emergency response system but need a replacement	67
Graph 54. Percentage of people who need an oxygen machine but do not have it.....	68
Graph 55. Percentage of people who have an oxygen machine but need a replacement	68
Graph 56. Percentage of people who need some other assistive device but do not have it	69

* Very small number of responses	69
Graph 57. Percentage of people who have some other assistive device but need a replacement	69
Safety	70
Graph 58. Percentage of people who feel safe around their paid support staff	71
Graph 59. Percentage of people who are ever worried for the security of their personal belongings	71
Graph 60. Percentage of people whose money was taken or used without their permission in the last 12 months	72
Graph 61. Percentage of people who are able to get to safety quickly in case of an emergency like a house fire	72
Graph 62. Percentage of people who know whom to talk to if they are mistreated or neglected	73
Graph 63. Percentage of people with concerns about falling or being unstable	73
Health Care	74
Graph 64. Percentage of people who have gone to the emergency room for any reason in the past year	75
Graph 65. Percentage of people whose emergency room visit in the past year was due to falling or losing balance	75
Graph 66. Percentage of people whose emergency room visit in the past year was due to tooth or mouth pain	76
Graph 67. Percentage of people whose emergency room visit in the past year was due to being unable to see their primary care doctor when they needed to	76
Graph 68. Percentage of people who can get an appointment to see their primary care doctor when they need to	77
Graph 69. Percentage of people feeling sad or depressed who have talked to someone about it in the past 12 months	77
Graph 70. Percentage of people who have had a physical exam or wellness visit in the past year	78
Graph 71. Percentage of people who have had a hearing exam in the past year	78
Graph 72. Percentage of people who have had a vision exam in the past year	79
Graph 73. Percentage of people who have had a flu shot in the past year	79
Graph 74. Percentage of people who have had a dental visit in the past year	80

Wellness	81
Graph 75. Percentage of people whose health was described as having gotten better compared to 12 months ago.....	82
Graph 76. Percentage of people who have discussed their forgetting things more often than before with a doctor or a nurse ..	82
Graph 77. Percentage of people who often feel sad or depressed.....	83
Graph 78. Percentage of people who often feel lonely	83
Graph 79. Percentage of people whose hearing was described as poor (with hearing aids, if wears any).....	84
Graph 80. Percentage of people whose vision was described as poor (with glasses or contacts, if wears any).....	84
Graph 81. Percentage of people who have access to healthy foods if they want them.....	85
Medications	86
Graph 82. Percentage of people who take medications that help them feel less sad or depressed	87
Graph 83. Percentage of people who understand what they take their prescription medications for.....	87
Rights and Respect.....	88
Graph 84. Percentage of people whose paid support staff treat them with respect	89
Graph 85. Percentage of people whose permission is asked before others enter their home/room (if in group setting)	89
Graph 86. Percentage of people who are able to lock the doors to their room if they want to (if in group setting)	90
Graph 87. Percentage of people who have enough privacy where they live (if in group setting).....	90
Graph 88. Percentage of people whose visitors are able to come at any time (if in group setting)	91
Graph 89. Percentage of people who have access to food at all times of the day (if in group setting)	91
Graph 90. Percentage of people who have access to information about services in their preferred language (if non-English)	92
Self-Direction	93
Graph 91. Percentage of people who can make decisions about what kind of services they get.....	94
Graph 92. Percentage of people who can make decisions about when they get their services	94

Graph 93. Percentage of people who can make decisions about their paid support staff.....	95
Work.....	96
Graph 94. Percentage of people who have a paying job.....	97
Graph 95. Percentage of people who would like a job (if not currently employed).....	97
Graph 96. Percentage of people wanting a job who had someone talk to them about job options.....	98
Graph 97. Percentage of people who do volunteer work	98
Graph 98. Percentage of people who would like to do volunteer work (if not currently volunteering)	99
Everyday Living.....	100
Graph 99. Percentage of people needing at least some assistance with everyday activities who always get enough of that assistance when they need it.....	101
Graph 100. Percentage of people needing at least some assistance with self-care who always get enough of that assistance when they need it	101
Affordability	102
Graph 101. Percentage of people who ever have to skip a meal due to financial worries	103

What is NCI-AD?

The National Core Indicators for Aging and Disabilities© (NCI-AD) are standard measures used across participating states to assess the quality of life and outcomes of seniors and adults with physical disabilities—including traumatic or acquired brain injury—who are accessing publicly-funded services through the Older Americans Act (OAA), Program of All-Inclusive Care for the Elderly (PACE), Medicaid, and/or state-funded programs. The program is coordinated by ADvancing States¹ (formerly the National Association of States United for Aging and Disabilities (NASUAD)) and Human Services Research Institute (HSRI). NCI-AD data are gathered through yearly in-person Adult Consumer Surveys administered by state Aging, Disability, and Medicaid Agencies (or an Agency-contracted vendor) to a sample of at least 400 individuals in each participating state. NCI-AD data measure the performance of states' long-term services and supports (LTSS) systems and service recipient outcomes, helping states prioritize quality improvement initiatives, engage in thoughtful decision making, and conduct futures planning with valid and reliable LTSS data. The program officially launched in the summer of 2015 with 13 participating states². The 2019-2020 project cycle marked its fifth year of implementation, with more than twenty states having participated. For more on the development and history of NCI-AD, refer to the [*National Core Indicators Aging and Disability Adult Consumer Survey: 2015-2016 National Results*](#) report, available on the NCI-AD website (www.NCI-AD.org).

NCI-AD Adult Consumer Survey

Survey Overview

The NCI-AD Adult Consumer Survey is designed to measure outcomes across nineteen broad domains comprising approximately 75 core indicators. Indicators are the standard measures used across states to assess the outcomes of services provided to individuals,

¹ ADvancing States (formerly NASUAD) is the membership organization for state Aging, Disability, and Medicaid directors. www.ADvancingStates.org

² Colorado, Delaware, Georgia, Indiana, Kansas, Maine, Minnesota, Mississippi, New Jersey, North Carolina, Ohio, Tennessee, and Texas.

including respect and rights, service coordination, care coordination, employment, health, safety, person-centered planning, etc. An example of an indicator in the Service Coordination domain is: “Percentage of people whose services meet their needs and goals”.

While most indicators correspond to a single survey question, a few refer to clusters of related questions. For example, the indicator “Percentage of people who have needed home modifications” in the Access to Needed Equipment domain is addressed by several survey questions that ask about the person’s need for various types of home modifications. Figure 1 below details NCI-AD domains and corresponding indicators.

Figure 1. 2019-2020 NCI-AD Domains and Indicators

Domain	NCI-AD Indicator
Community Participation	Percentage of people who are able to do things they enjoy outside of home as much as they want to
	Percentage of people who are as active in their community as they would like to be
Choice and Control	Percentage of people in group settings who are able to furnish and decorate their room however they want to
	Percentage of people in group settings who are able to choose their roommate
	Percentage of people who feel in control of their life
	Percentage of people who are able to get up and go to bed when they want to
	Percentage of people who are able to eat their meals when they want to
Relationships	Percentage of people who are able to see or talk to their friends and family when they want
Satisfaction	Percentage of people who like where they live
	Percentage of people who want to live somewhere else
	Percentage of people whose case manager changes too often
	Percentage of people whose paid support staff change too often
	Percentage of people whose paid support staff do things the way they want them done
	Percentage of people who like how they spend their time during the day
	Percentage of people whose services help them live a better life
	Percentage of people who can reach their case manager when they need to

Domain	NCI-AD Indicator
Service Coordination	Percentage of people who know whom to contact if they have a complaint about their services
	Percentage of people who know whom to contact if they want to make changes to their services
	Percentage of people whose paid support staff come and leave when they are supposed to
	Percentage of people who have a backup plan if their paid support staff don't show up
	Percentage of people who have an emergency plan in place
	Percentage of people whose services meet their needs and goals
	Percentage of people whose case manager talked to them about services that might help with their unmet needs
Care Coordination	Percentage of people with concerns about falling who had someone work with them to reduce risk of falls
	Percentage of people who felt comfortable going home after being discharged from a hospital or rehab/nursing facility
	Percentage of people who had adequate follow-up after being discharged from a hospital or rehab/nursing facility
	Percentage of people who know how to manage their chronic conditions
Access to Community	Percentage of people who have adequate transportation to get to medical appointments
	Percentage of people who have adequate transportation to do the things they want outside of home
Access to Needed	Percentage of people who have needed home modifications
	Percentage of people who have needed assistive equipment and devices
Safety	Percentage of people with concerns about falling
	Percentage of people who feel safe around their support staff
	Percentage of people who are able to get to safety quickly in case of an emergency
	Percentage of people who know whom to talk to if they are mistreated or neglected
	Percentage of people who are worried for the security of their personal belongings
	Percentage of people whose money has been taken without their permission
Health Care	Percentage of people who have talked to someone about feeling sad or depressed
	Percentage of people who can get an appointment to see their primary care doctor when they need to
	Percentage of people who experience potentially preventable emergency room visits
	Percentage of people who have preventive health screenings and exams in a timely manner

Domain	NCI-AD Indicator
Wellness	Percentage of people who have access to healthy foods
	Percentage of people whose health is better than 12 months ago
	Percentage of people with uncorrected poor hearing
	Percentage of people with uncorrected poor vision
	Percentage of people who have discussed forgetting things with a health care professional
	Percentage of people who often feel lonely
	Percentage of people who often feel sad or depressed
Medications	Percentage of people who know what their prescription medications are for
	Percentage of people who take medications to help them feel less sad or depressed
Rights and Respect	Percentage of people who have access to information about services in their preferred language
	Percentage of people whose paid support staff treat them with respect
	Percentage of people in group settings whose permission is asked before others enter their room
	Percentage of people in group settings who are able to lock the door to their room
	Percentage of people in group settings who have enough privacy
	Percentage of people in group settings whose visitors are able to come at any time
	Percentage of people in group settings who always have access to food
Self-Direction	Percentage of people who can choose what services they receive
	Percentage of people who can choose when they receive services
	Percentage of people who can choose their paid support staff
Work	Percentage of people who have a paid job
	Percentage of people who would like a job
	Percentage of people wanting a job who receive job search assistance
	Percentage of people who volunteer
	Percentage of people who would like to volunteer

Domain	NCI-AD Indicator
Everyday Living	Percentage of people who have adequate support for everyday activities
	Percentage of people who have adequate support for self-care
Affordability	Percentage of people who have to cut back on food due to finances
Person-Centered Planning (OPTIONAL MODULE)	Percentage of people who remember their last service planning meeting
	Percentage of people who are involved in making decisions about their service plan
	Percentage of people whose service planning meeting took place at a convenient time
	Percentage of people whose service planning meeting took place in a convenient location
	Percentage of people whose service planning meeting included the people they wanted to be there
	Percentage of people who discussed their preferences and needs in the service planning meeting
	Percentage of people who received a copy of their service plan after the service planning meeting
	Percentage of people whose service plan reflects what was discussed in the service plan meeting
	Percentage of people whose service plan includes their preferences and choices

Survey Organization

The NCI-AD Adult Consumer Survey tool consists of the Pre-Survey form, the Background Information Section, the Full In-Person Survey, and the Interviewer Feedback Form. An alternative Proxy Version of the In-Person Survey is available for those interviews that need to be conducted with proxies of service recipients instead of the service recipient themselves. Each part of the tool is described below.

Pre-Survey form: The Pre-Survey section is an optional form intended to collect information that may be helpful for surveyors to prepare for and schedule the survey meetings. The Pre-Survey form is for surveyor use only; Pre-Survey information is not submitted or used for any data analysis or reporting.

Background Information (BI) Section: The BI Section collects demographic and service-related information about the service recipient. To the extent possible, data for the BI Section are derived from states' existing administrative records. BI items not

available from state administrative data sources may be collected by surveyors at the end of the survey meeting. Surveyors may collect any missing BI information with the exception of five BI items that must be completed using administrative data sources (person's primary source of LTSS funding/program, LTSS services received through that program, length of receiving services, participation in a self-directed supports option, and legal guardianship status). Each BI item tracks whether data were derived from existing administrative records or collected by surveyors as part of the survey meetings.

In-Person Survey: The Full In-Person Survey consists of approximately 90 questions, with related questions grouped together by theme or topic (e.g., a series of questions about employment, a series of questions about support staff, etc.); another 10 questions comprise the optional Person-Centered Planning module. The Full In-Person Survey is completed face-to-face with the person receiving services. The respondent may ask their proxy (e.g. a family member or a close friend) for assistance with answering some of the questions, if needed. The Full In-Person Survey includes both subjective and objective questions; proxy assistance is only allowed for a defined subset of more objective items.

Proxy Version: The Proxy Version is an alternative version of the In-Person Survey. It is used in place of the Full In-Person Survey when the person receiving services is unable or unwilling to provide valid responses or has asked their proxy to complete the survey on their behalf. The Proxy Version includes only the subset of more objective questions from the Full Survey that allow for proxy assistance. Questions in the Proxy Version are rephrased to be in third person, making it clear their subject is the person receiving services and not the proxy respondent. Surveyors must meet with the service recipient face-to-face and attempt to interview them; only after the in-person attempt has been made can the proxy be surveyed instead of the service recipient.

Interviewer Feedback Form: The Interviewer Feedback Form is completed by surveyors after the survey meeting is concluded. It collects information about the survey meeting itself, such as when/where the meeting took place, who was present, the respondent's level of comprehension, etc. Surveyors are also asked to provide any feedback they may have about the survey tool itself or the survey process overall.

Impact of COVID-19 on 2019-20 Data Collection and Reporting

Due to the COVID-19 Pandemic the 2019-20 Adult Consumer Survey (ACS) data collection period was unexpectedly abbreviated and all data collection stopped in April. At the time surveying ended, states were in many different stages of survey administration. Very few states had completed data collection. NCI-AD made the decision to offer to provide state reports to all states that collected data during the 2019-20 survey year. As states were in various stages of completion, some demographics – including program populations – may not be fully represented. Therefore, data presented in this report are for internal state use only and data ***should not*** be used as a true comparison between states this year or in previous years.

NCI-AD in Kansas

The Kansas Department for Aging and Disability Services (KDADS) implemented the 2018-2019 NCI-AD Adult Consumer Survey in Kansas. KDADS recognized the need for an assessment of the state's publicly funded home and community-based services (HCBS), including the HCBS/Traumatic Brain Injury/Brain Injury (TBI/BI), HCBS/Physical Disabilities (PD) and HCBS/Frail Elderly (FE). The NCI-AD was identified by KDADS as a valuable tool that will allow comparisons to other States in the nation when it comes to community-based services. Data from the project will be used to support efforts in Kansas to strengthen LTSS policy, inform quality assurance activities, and improve the quality of life of LTSS participants.

Sample

The total number of NCI-AD Adult Consumer Surveys conducted in Kansas in 2019-2020 and included for analysis was two hundred eighty-four (Total N=284). Three program populations were included in the survey sample and are detailed below.

Frail and Elderly (FE) Waiver: This program provides assistance to individuals ages 65 and older who qualify to receive Medicaid and require LTSS in order to remain in a community setting, as determined through a state level of care assessment. Services include Adult Day Care, Assistive Technology, Comprehensive Support, Enhanced Care Service, Financial Management Services, Home Telehealth, Medication Reminder, Nursing Evaluation Visit, Oral Health Services,

Personal Care Services, Personal Emergency Response, and Wellness Monitoring. The option for individuals to self-direct their care is made available for the following services: Comprehensive Support, Enhanced Care Service, Financial Management Services, and Personal Care Services. One hundred twenty-one people (N=121) from this program were interviewed and included for analysis.

Physical Disability (PD) Waiver: This program provides LTSS to those individuals between the ages of 16 and 64 who have a qualifying physical disability, qualify to receive Medicaid, and require LTSS in order to remain in a community setting, as determined through a state level of care assessment. Services include Assistive Services, Enhanced Care Service, Financial Management Services, Home-Delivered Meals Service, Medication Reminder Services, Personal Care Services, and Personal Emergency Response. The option for individuals to self-direct their care is made available for the following services: Enhanced Care Service, Financial Management Services, and Personal Care Services. One hundred fifty-five people (N=155) from this program were interviewed and included for analysis.

Traumatic Brain Injury (TBI) Waiver: This program provides assistance to those individuals between the ages of 16 and 65 who have a documented and traumatically-incurred brain injury, demonstrate the capacity for progress in rehabilitation and independent living skills, qualify to receive Medicaid, and require LTSS in order to remain in a community setting, as determined through a state level of care assessment. Individuals who receive services through this waiver may continue to do so up to four years until it is determined that they are no longer making progress in rehabilitation and improved living skills. Exceptions to this timeframe are subject to a standardized review process at the state level. Services include Assistive Services, Behavior Therapy, Cognitive Rehabilitation, Enhanced Care Service, Home-Delivered Meals Service, Medication Reminder Services, Occupational Therapy, Personal Care Services, Personal Emergency Response, Physical Therapy, and Transitional Living Skills. The Traumatic Brain Injury (TBI) Waiver was replaced with the Brain Injury (BI) Waiver effective December 31, 2019. Seven people (N=7) from this program were interviewed and included for analysis.

Figure 2 below summarizes programs included in Kansas' NCI-AD survey sample, the number of survey-eligible service recipients in each and the corresponding number of conducted surveys included for analysis. Also included are calculations of margin of error for

each program under two scenarios: assuming a very conservative 0.5 distribution of responses and assuming a somewhat less conservative 0.7 distribution of responses. Using the 0.5 distribution of responses is the most conservative distribution assumption for calculating margins of error that can be made and is usually used when no prior information is available about true population response distributions. When some prior information about distributions of responses in the population is available, it can be used for calculating less conservative margins of error. Based on distributions observed in previously collected NCI-AD data, it is reasonable to assume a somewhat less conservative population response distribution of 0.7 for calculating margins of error. Calculations in both scenarios use the total number of analyzed surveys in each program. It is important to note that the actual number of valid responses to an individual survey item may be smaller than the total number of analyzed surveys. This is explained in more detail in the “Organization of Results” section below.

Figure 2. Number of survey-eligible service recipients, number of analyzed surveys, and calculations of margins of error by program.

Program	Number of analyzed surveys	Number of eligible participants	Margin of error (MoE) and confidence level (CL), assuming 0.7 distribution	Margin of error (MoE) and confidence level (CL), assuming 0.5 distribution
FE Waiver	121	4,600	8.1% MoE, 95% CL	8.8% MoE, 95% CL
PD Waiver	155	5,800	7.1% MoE, 95% CL	7.8% MoE, 95% CL
TBI Waiver	7	400	33.7% MoE, 95% CL	36.8% MoE, 95% CL
Total	284³	10,800	5.3% MoE, 95% CL	5.7% MoE, 95% CL

³ Program was missing for 1 case included for analysis.

Survey Process in Kansas

KDADS utilized agency resources to provide random samples of program participants and conduct the interviews. Samples were provided via a secure web-based application to survey staff. The process included consulting with service providers, reviewing system records, and in-person interviews with individuals receiving services. Information obtained by Quality Management Strategy (QMS) staff was entered into the ODESA database (NCI-AD's data portal).

Kansas used NCI-AD's optional module on person-centered planning (PCP) in all three of its programs surveyed. In addition, Kansas chose to add 9 state-specific questions to the standard NCI-AD Survey.

Stakeholders

KDADS provides ongoing NCI-AD engagement activities through various stakeholder groups and organizations within the state. These stakeholders include HCBS Participants, HCBS Providers, Kansas Health Care Association, LeadingAge, Kansas Adult Care Executives (KACE), LTC Ombudsman, Area Agencies on Aging (AAAs) and InterHab. KDADS meets with the stakeholders through various committees and settings each month to engage in discussions related to findings from surveys on client experience as well as reaction to data from completed surveys.

Organization of Results

The following pages of the report presents findings from Kansas' 2019-2020 NCI-AD Adult Consumer Survey data collection cycle. Results are grouped by domain and are presented in chart format. Charts show results for individual survey items broken out by each program. The number of people (N) in each program that gave valid responses to that survey item are also shown. The number of valid responses to an item may be smaller than the total number of analyzed surveys, for the following reasons:

- Certain questions in the survey can only be asked of the service recipient – i.e. proxy respondents for these questions are not allowed. These questions have a smaller number of responses because they are contained only in the full In-Person Survey, whereas the total number of analyzed surveys also includes cases when the Proxy Version was used.
- Only valid responses are included in both the denominator and the numerator when calculating percentages. Unclear, refused and, for most items, “don’t know” responses are excluded.
- The survey contains several skip logic patterns. This means that depending on the response to a previous survey item, a question may or may not be asked, as appropriate. When an item is skipped due to skip logic, the survey case does not contribute to the calculations for the item.

Please note: Extreme caution should be used when interpreting results where the number of valid responses is small. Each program’s valid number of responses (valid Ns) is shown in every chart and table in this report. In addition to displaying valid number of responses, charts also use an asterisk to indicate Ns smaller than 20. Responses smaller than 20 should not be used as a basis for firm conclusions and should be treated as suggestive and informational only.

Each chart also contains Kansas’ weighted state average, as well as the total number of observed valid responses for that survey item. A weighted state average takes into account whether the sampling strategy proportionally oversampled one or more of the state’s programs; its calculation effectively “re-balances” the oversampled programs to produce an average one would expect if they were represented proportionally relative to the populations they serve. Kansas’ sampling design did include oversampling of some of its programs – i.e. some programs constituted a larger proportion of the survey sample than they did as proportion of total population of survey-eligible service recipients. To account for these programs being proportionally over-represented in the state’s survey data, statistical weights were developed and applied to calculate Kansas’ weighted state averages presented in the charts. For exact calculations of weights, please contact the NCI-AD project team.

Charts present results using binary data indicating presence or absence of the outcome. For the purposes of analysis, most survey items with three or more possible response options were recoded to form binary variables (i.e. responses were collapsed, for example, an “always” response combined with a “most of the time” response). For details about recoded items and the rules on

collapsing response options, please refer to Appendix A. Unless otherwise stated, “don’t know” and unclear/refused responses were excluded from both the numerator and denominator.

Un-collapsed and unweighted data showing frequencies of all response options by program are shown in tabular format in Appendix B. These tables contain all response options, including “don’t know” and unclear/refused/no response categories. Tables also contain Kansas’ unweighted overall sample averages for all response options. Please note that the “sample averages” in tables in Appendix B are simple (unweighted) averages that didn’t employ weights in their calculations and may therefore be slightly different from the corresponding weighted state averages shown in the charts.

Data from state-specific questions that Kansas chose to add to the standard NCI-AD Survey are shown in Appendix C. Kansas’ data from NCI-AD’s optional PCP module are shown in Appendix D.

Limitations of Report

This report contains survey results related to the quality and outcomes of LTSS in Kansas. However, it does not provide benchmarks for acceptable or unacceptable levels of performance. Rather, it is up to state staff, leadership, and other stakeholders to assess information contained in this report and establish priorities. This report is intended to be one mechanism to assess the current state of Kansas’ LTSS system and identify areas that are working well and areas that could use improvement. The charts in this report allow the reader to compare average outcomes between Kansas’ programs and the state overall. State leaders, public managers, policymakers and community stakeholders can use this information to decide whether a program’s result relative to another program or to the state average suggests further investigation or intervention is necessary. However, discretion should be used when comparing a program’s result relative to another program, as it is important to keep in mind the potential differences as well as similarities amongst program participants and the programs themselves.

Results

Community Participation

People are able to participate in preferred activities outside of home.

There are two Community Participation indicators measured by the NCI-AD Adult Consumer Survey:

1. Percentage of people who are able to do things they enjoy outside of home as much as they want to
2. Percentage of people who are as active in their community as they would like to be

There are three⁴ survey items that correspond to the Community Participation domain.

Un-collapsed data are shown in Appendix B.

⁴ Data for one item are presented in Appendix B only.

Graph 1. Percentage of people who are as active in their community as they would like to be

* Very small number of responses

Graph 2. Percentage of people who are able to do things they enjoy outside of home as much as they want to

* Very small number of responses

Choice and Control

People are involved in making decisions about their everyday lives.

There are five Choice and Decision-Making indicators measured by the NCI-AD Adult Consumer Survey:

1. Percentage of people in group settings who are able to furnish and decorate their room however they want to
2. Percentage of people in group settings who are able to choose their roommate
3. Percentage of people who feel in control of their life⁵
4. Percentage of people who are able to get up and go to bed when they want to
5. Percentage of people who are able to eat their meals when they want to

There are five survey items that correspond to the Choice and Decision-Making domain.

Un-collapsed data are shown in Appendix B.

⁵ Indicator previously reported in the “Control” domain.

Graph 3. Percentage of people who are able to choose their roommate (if in group setting⁶ and have roommates)

* Very small number of responses

Graph 4. Percentage of people who get up and go to bed when they want to

* Very small number of responses

⁶ Group/adult family/foster/host home, assisted living/residential care facility, nursing facility/nursing home

Graph 5. Percentage of people who can eat their meals when they want to

* Very small number of responses

Graph 6. Percentage of people who are able to furnish and decorate their room however they want to (if in group setting⁷)

* Very small number of responses

⁷ Group/adult family/foster/host home, assisted living/residential care facility, nursing facility/nursing home

Graph 7. Percentage of people who never feel in control of their lives⁸

* Very small number of responses

⁸ Item previously reported in the "Control" domain.

Relationships

People have friends and relationships.

There is one Relationship indicator measured by the NCI-AD Adult Consumer Survey:

1. Percentage of people who are able to see or talk to their friends and families when they want

There are two⁹ survey items that correspond to the Relationship domain.

Un-collapsed data are shown in Appendix B.

⁹ Data for one item are presented in Appendix B only.

Graph 8. Percentage of people who are always able to see or talk to friends and family when they want to (if there are friends and family who do not live with person)

* Very small number of responses

Satisfaction

People are satisfied with their everyday lives.

There are seven Satisfaction indicators measured by the NCI-AD Adult Consumer Survey:

1. Percentage of people who like where they live
2. Percentage of people who want to live somewhere else
3. Percentage of people whose case manager changes too often¹⁰
4. Percentage of people whose paid support staff change too often
5. Percentage of people whose paid support staff do things the way they want them done
6. Percentage of people who like how they spend their time during the day
7. Percentage of people whose services help them live a better life¹¹

There are nine¹² survey items that correspond to the Satisfaction domain.

Un-collapsed data are shown in Appendix B.

¹⁰ New indicator in 2019-2020.

¹¹ New indicator in 2019-2020.

¹² Data for two items are presented in Appendix B only.

Graph 9. Percentage of people who like where they live

* Very small number of responses

Graph 10. Percentage of people who want to live somewhere else

* Very small number of responses

Graph 11. Percentage of people who like how they spend their time during the day

Graph 12. Percentage of people whose paid support staff change too often

Graph 13. Percentage of people whose paid support staff do things the way they want them done

Graph 14. Percentage of people whose case manager changes too often¹³

¹³ New item in 2019-2020.

Graph 15. Percentage of people whose services help them live a better life¹⁴

* Very small number of responses

¹⁴ New item in 2019-2020.

Service Coordination

Service coordinators are accessible and responsive, and the person receives needed services.

There are eight Service Coordination indicators measured by the NCI-AD Adult Consumer Survey:

1. Percentage of people who can reach their case manager when they need to
2. Percentage of people who know whom to contact if they have a complaint about their services
3. Percentage of people who know whom to contact if they want to make changes to their services
4. Percentage of people whose support staff come and leave when they are supposed to
5. Percentage of people who have a backup plan if their paid support staff don't show up
6. Percentage of people who have an emergency plan in place
7. Percentage of people whose services meet their needs and goals
8. Percentage of people whose case manager talked to them about services that might help with their unmet needs

There are fourteen¹⁵ survey items that correspond to the Service Coordination domain.

Un-collapsed data are shown in Appendix B.

¹⁵ Data for six items are presented in Appendix B only.

Graph 16. Percentage of people who know whom to contact if they want to make changes to their services

Graph 17. Percentage of people who know whom to contact if they have a complaint about their services

Graph 18. Percentage of people whose paid support staff show up and leave when they are supposed to

* Very small number of responses

Graph 19. Percentage of people who have an emergency plan in place

* Very small number of responses

Graph 20. Percentage of people whose long-term services meet all their current needs and goals

Graph 21. Percentage of people whose case manager/care coordinator talked to them about services and resources that might help with their unmet needs and goals (if have unmet needs and goals and know they have case manager/care coordinator)

Graph 22. Percentage of people who have a backup plan if their paid support staff do not show up

* Very small number of responses

Graph 23. Percentage of people who can reach their case manager/care coordinator when they need to (if know they have case manager/care coordinator)

* Very small number of responses

Care Coordination

Individuals are provided appropriate coordination of care.

There are four Care Coordination indicators measured by the NCI-AD Adult Consumer Survey:

1. Percentage of people who feel comfortable going home after being discharged from a hospital or a rehab facility
2. Percentage of people who have adequate follow-up after being discharged from a hospital or a rehab facility
3. Percentage of people who know how to manage their chronic conditions
4. Percentage of people with concerns about falling who had someone work with them to reduce risk of falls

There are five¹⁶ survey items that correspond to the Care Coordination domain.

Un-collapsed data are shown in Appendix B.

¹⁶ Data for one item are presented in Appendix B only.

Graph 24. Percentage of people who felt comfortable and supported enough to go home (or where they live) after being discharged from a hospital or rehabilitation facility in the past year

* Very small number of responses

Graph 25. Percentage of people who had someone follow up with them after being discharged from a hospital or rehabilitation facility in the past year

* Very small number of responses

Graph 26. Percentage of people who know how to manage their chronic condition(s)

* Very small number of responses

Graph 27. Percentage of people with concerns about falling or being unstable who had somebody talk to them or work with them to reduce the risk

* Very small number of responses

Access to Community

Services facilitate individuals' access to community.

There are two Access to Community indicators measured by the NCI-AD Adult Consumer Survey:

1. Percentage of people who have adequate transportation to get to medical appointments
2. Percentage of people who have adequate transportation to do the things they want outside of home

There are two survey items that correspond to the Access to Community domain.

Un-collapsed data are shown in Appendix B.

Graph 28. Percentage of people who have transportation when they want to do things outside of their home (non-medical)

* Very small number of responses

Graph 29. Percentage of people who have transportation to get to medical appointments when they need to

* Very small number of responses

Access to Needed Equipment

People have access to needed home modifications and assistive equipment.

There are two Access to Needed Equipment indicators measured by the NCI-AD Adult Consumer Survey:

1. Percentage of people who have needed home modifications
2. Percentage of people who have needed assistive equipment and devices

There are two survey items that correspond to the Access to Needed Equipment domain.

Un-collapsed data are shown in Appendix B.

Safety

People feel safe from abuse, neglect, and injury.

There are six Safety indicators measured by the NCI-AD Adult Consumer Survey:

1. Percentage of people with concerns about falling¹⁹
2. Percentage of people who feel safe around their paid support staff
3. Percentage of people who are worried for the security of their personal belongings
4. Percentage of people who are able to get to safety quickly in case of an emergency
5. Percentage of people whose money has been taken without their permission
6. Percentage of people who know whom to talk to if they are mistreated or neglected²⁰

There are six survey items that correspond to the Safety domain.

Un-collapsed data are shown in Appendix B.

¹⁹ Indicator previously reported in the “Care Coordination” domain.

²⁰ New indicator in 2019-2020.

Graph 58. Percentage of people who feel safe around their paid support staff

* Very small number of responses

Graph 59. Percentage of people who are ever worried for the security of their personal belongings

* Very small number of responses

Graph 60. Percentage of people whose money was taken or used without their permission in the last 12 months

Graph 61. Percentage of people who are able to get to safety quickly in case of an emergency like a house fire

Graph 62. Percentage of people who know whom to talk to if they are mistreated or neglected²¹

* Very small number of responses

Graph 63. Percentage of people with concerns about falling or being unstable²²

* Very small number of responses

²¹ New item in 2019-2020.

²² Item previously reported in the "Care Coordination" domain.

Health Care

People secure needed health services.

There are four Health Care indicators measured by the NCI-AD Adult Consumer Survey:

1. Percentage of people who experience potentially preventable emergency room visits
2. Percentage of people who have needed health screenings and exams in a timely manner
3. Percentage of people who can get an appointment with their doctor when they need to
4. Percentage of people who have talked to someone about feeling sad or depressed

There are five survey items that correspond to the Health Care domain.

Un-collapsed data are shown in Appendix B.

Graph 64. Percentage of people who have gone to the emergency room for any reason in the past year

Graph 65. Percentage of people whose emergency room visit in the past year was due to falling or losing balance

Graph 66. Percentage of people whose emergency room visit in the past year was due to tooth or mouth pain

* Very small number of responses

Graph 67. Percentage of people whose emergency room visit in the past year was due to being unable to see their primary care doctor when they needed to

* Very small number of responses

Graph 68. Percentage of people who can get an appointment to see their primary care doctor when they need to

* Very small number of responses

Graph 69. Percentage of people feeling sad or depressed who have talked to someone about it in the past 12 months

* Very small number of responses

Graph 70. Percentage of people who have had a physical exam or wellness visit in the past year

* Very small number of responses

Graph 71. Percentage of people who have had a hearing exam in the past year

* Very small number of responses

Graph 72. Percentage of people who have had a vision exam in the past year

Graph 73. Percentage of people who have had a flu shot in the past year

Graph 74. Percentage of people who have had a dental visit in the past year

* Very small number of responses

Wellness

People are supported to maintain wellness.

There are seven Wellness indicators measured by the NCI-AD Adult Consumer Survey:

1. Percentage of people whose health is better than 12 months ago
2. Percentage of people who have discussed forgetting things with a health care professional
3. Percentage of people with uncorrected poor hearing
4. Percentage of people with uncorrected poor vision
5. Percentage of people who often feel sad or depressed
6. Percentage of people who have access to healthy foods
7. Percentage of people who often feel lonely²³

There are nine²⁴ survey items that correspond to the Wellness domain.

Un-collapsed data are shown in Appendix B.

²³ New indicator in 2019-2020.

²⁴ Data for two items are presented in Appendix B only.

Graph 75. Percentage of people whose health was described as having gotten better compared to 12 months ago

Graph 76. Percentage of people who have discussed their forgetting things more often than before with a doctor or a nurse

Graph 77. Percentage of people who often feel sad or depressed

Graph 78. Percentage of people who often feel lonely²⁵

²⁵ New item in 2019-2020.

Graph 79. Percentage of people whose hearing was described as poor (with hearing aids, if wears any)

Graph 80. Percentage of people whose vision was described as poor (with glasses or contacts, if wears any)

Graph 81. Percentage of people who have access to healthy foods if they want them

* Very small number of responses

Medications

Medications are managed effectively and appropriately.

There are two Medication indicators measured by the NCI-AD Adult Consumer Survey:

1. Percentage of people who take medications to help them feel less sad or depressed
2. Percentage of people who know what their prescription medications are for

There are two survey items that correspond to the Medication domain.

Un-collapsed data are shown in Appendix B.

Graph 82. Percentage of people who take medications that help them feel less sad or depressed

* Very small number of responses

Graph 83. Percentage of people who understand what they take their prescription medications for

* Very small number of responses

Rights and Respect

People receive the same respect, rights and protections as others in the community.

There are seven Rights and Respect indicators measured by the NCI-AD Adult Consumer Survey:

1. Percentage of people who have access to information about services in their preferred language²⁶
2. Percentage of people whose paid support staff treat them with respect
3. Percentage of people in group settings whose permission is asked before others enter their room
4. Percentage of people in group settings who are able to lock the door to their room
5. Percentage of people in group settings who have enough privacy
6. Percentage of people in group settings whose visitors are able to come at any time
7. Percentage of people in group settings who always have access to food

There are seven survey items that correspond to the Rights and Respect domain.

Un-collapsed data are shown in Appendix B.

²⁶ Indicator previously reported in the “Service Coordination” domain.

Graph 84. Percentage of people whose paid support staff treat them with respect

Graph 85. Percentage of people whose permission is asked before others enter their home/room (if in group setting)²⁷

²⁷ Group/adult family/foster/host home, assisted living/residential care facility, nursing facility/nursing home

Graph 86. Percentage of people who are able to lock the doors to their room if they want to (if in group setting²⁸)

* Very small number of responses

Graph 87. Percentage of people who have enough privacy where they live (if in group setting²⁹)

²⁹ Group/adult family/foster/host home, assisted living/residential care facility, nursing facility/nursing home

Graph 88. Percentage of people whose visitors are able to come at any time (if in group setting)³⁰

Graph 89. Percentage of people who have access to food at all times of the day (if in group setting)³¹

³⁰ Group/adult family/foster/host home, assisted living/residential care facility, nursing facility/nursing home

³¹ Group/adult family/foster/host home, assisted living/residential care facility, nursing facility/nursing home

Graph 90. Percentage of people who have access to information about services in their preferred language (if non-English)³²

* Very small number of responses

³² Item previously reported in "Service Coordination" domain

Self-Direction

People have authority and are supported to direct and manage their own services.

There are three Self-Direction indicators measured by the NCI-AD Adult Consumer Survey:

1. Percentage of people who can choose what services they receive
2. Percentage of people who can choose when they receive services
3. Percentage of people who can choose their paid support staff

There are three survey items that correspond to the Self-Direction domain.

Un-collapsed data are shown in Appendix B.

Graph 91. Percentage of people who can make decisions about what kind of services they get

Graph 92. Percentage of people who can make decisions about when they get their services

Graph 93. Percentage of people who can make decisions about their paid support staff

* Very small number of responses

Work

People have support to find and maintain community integrated employment if they want it.

There are five Work indicators measured by the NCI-AD Adult Consumer Survey:

1. Percentage of people who have a paid job
2. Percentage of people who would like a job
3. Percentage of people wanting a job who receive job search assistance
4. Percentage of people who volunteer
5. Percentage of people who would like to volunteer

There are five survey items that correspond to the Work domain.

Un-collapsed data are shown in Appendix B.

Graph 94. Percentage of people who have a paying job

* Very small number of responses

Graph 95. Percentage of people who would like a job (if not currently employed)

* Very small number of responses

Graph 96. Percentage of people wanting a job who had someone talk to them about job options

Graph 97. Percentage of people who do volunteer work

Graph 98. Percentage of people who would like to do volunteer work (if not currently volunteering)

* Very small number of responses

Everyday Living

People have enough supports for everyday living.

There are two Everyday Living indicators measured by the NCI-AD Adult Consumer Survey:

1. Percentage of people who have adequate support for everyday activities
2. Percentage of people who have adequate support for self-care

There are four³³ survey items that correspond to the Everyday Living domain.

Un-collapsed data are shown in Appendix B.

³³ Data for two items are presented in Appendix B only.

Graph 99. Percentage of people needing at least some assistance with everyday activities who always get enough of that assistance when they need it

* Very small number of responses

Graph 100. Percentage of people needing at least some assistance with self-care who always get enough of that assistance when they need it

* Very small number of responses

Affordability

People have enough available resources.

There is one Affordability indicator measured by the NCI-AD Adult Consumer Survey:

1. Percentage of people who have to cut back on food due to finances.

There is one survey item that corresponds to the Affordability domain.

Un-collapsed data are shown in Appendix B.

Graph 101. Percentage of people who ever have to skip a meal due to financial worries

* Very small number of responses

Appendix A: Rules for Recoding and Collapsing Responses

Table A1 below details collapsing rules for recoding survey items with three or more response options into binary variables used for analysis. The table also specifies which graphs in this report contain recoded items, as well as their associated NCI-AD domains. Unless otherwise stated, “Don’t Know” and “Unclear/Refused” responses are excluded.

Table A1. Outcome Variables – Collapsing Rules

Domain	Item	Graph #	Collapsing Logic
Community Participation	Percentage of people who are as active in their community as they would like to be	1	Collapse “No” and “Sometimes”
Choice and Control	Percentage of people who get up and go to bed when they want to	4	Collapse “Some days, sometimes” and “No, never”
	Percentage of people who can eat their meals when they want to	5	Collapse “Some days, sometimes” and “No, never”
	Percentage of people who are able to furnish and decorate their room however they want to (if in group setting)	6	Collapse “In all ways” and “In most ways”
	Percentage of people who never feel in control of their lives	7	Collapse “Yes, almost always, always” and “In-between, sometimes”
Relationships	Percentage of people who are always able to see or talk to friends and family when they want to (if there are friends and family who do not live with person)	8	Collapse “Most of the time, usually, or some family and/or friends” and “No, or rarely”
Satisfaction	Percentage of people who like where they live	9	Collapse “In-between, most of the time” and “No”
	Percentage of people who want to live somewhere else	10	Collapse “Yes” and “Maybe”
	Percentage of people who like how they spend their time during the day	11	Collapse “Some days, sometimes” and “No, never”
	Percentage of people whose paid support staff change too often	12	Collapse “Yes” and “Some, or sometimes”
	Percentage of people whose paid support staff do things the way they want them done	13	Collapse “Some, or usually” and “No, never or rarely”
Service Coordination	Percentage of people who know whom to contact if they want to make changes to their services	16	Collapse “Not sure, maybe” and “No”
	Percentage of people who know whom to contact if they have a complaint about their services	17	Collapse “Not sure, maybe” and “No”

Domain	Item	Graph #	Collapsing Logic
	Percentage of people whose paid support staff show up and leave when they are supposed to	18	Collapse “Some, or usually” and “No, never or rarely”
	Percentage of people whose long-term services meet all their current needs and goals	20	Collapse “No, not at all” and “Some needs and goals”
	Percentage of people who can reach their case manager/care coordinator when they need to (if know they have case manager/care coordinator)	23	Collapse “Most of the time, usually” and “No, or only sometimes”
Care Coordination	Percentage of people who felt comfortable and supported enough to go home (or where they live) after being discharged from a hospital or rehabilitation facility in the past year	24	Collapse “No” and “In-between”
	Percentage of people who know how to manage their chronic condition(s)	26	Collapse “No” and “In-between, or some conditions”
Access to Community	Percentage of people who have transportation when they want to do things outside of their home (non-medical)	28	Collapse “No” and “Sometimes”
	Percentage of people who have transportation to get to medical appointments when they need to	29	Collapse “No” and “Sometimes”
Access to Needed Equipment	Percentage of people who need grab bars in the bathroom or elsewhere in their home but do not have them	30	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who have grab bars in the bathroom or elsewhere in their home but need a replacement	31	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who need bathroom modifications (other than grab bars) but do not have them	32	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who have bathroom modifications (other than grab bars) but need a replacement	33	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who need a specialized bed but do not have it	34	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who have a specialized bed but need a replacement	35	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who need a ramp or stair lift in or outside the home but do not have it	36	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”

Domain	Item	Graph #	Collapsing Logic
	Percentage of people who have a ramp or stair lift in or outside the home but need a replacement	37	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who need some other home modification but do not have it	38	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who have some other home modification but need a replacement	39	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who need a walker but do not have it	40	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who have a walker but need a replacement	41	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who need a scooter but do not have it	42	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who have a scooter but need a replacement	43	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who need a wheelchair but do not have it	44	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who have a wheelchair but need a replacement	45	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who need hearing aids but do not have them	46	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who have hearing aids but need a replacement	47	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who need glasses but do not have them	48	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who have glasses but need a replacement	49	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who need a shower chair but do not have it	50	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who have a shower chair but need a replacement	51	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”

Domain	Item	Graph #	Collapsing Logic
	Percentage of people who need a personal emergency response system but do not have it	52	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who have a personal emergency response system but need a replacement	53	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who need an oxygen machine but do not have it	54	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who have an oxygen machine but need a replacement	55	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who need some other assistive device but do not have it	56	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Percentage of people who have some other assistive device but need a replacement	57	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
Safety	Percentage of people who know whom to talk to if they are mistreated or neglected	62	Collapse “Maybe, not sure” and “No”
	Percentage of people with concerns about falling or being unstable	63	Collapse “Yes, often” and “Sometimes”
Health Care	Percentage of people who can get an appointment to see their primary care doctor when they need to	68	Collapse “Usually” and “No, rarely”
Wellness	Percentage of people whose health was described as having gotten better compared to 12 months ago	75	Collapse “Much better” and “Somewhat better”; Collapse “Much worse”, “Somewhat worse” and “About the same”
	Percentage of people who often feel sad or depressed	77	Collapse “Never, or almost never”, “Not often”, and “Sometimes”
	Percentage of people who often feel lonely	78	Collapse “Never, or almost never”, “Not often”, and “Sometimes”
	Percentage of people whose hearing was described as poor (with hearing aids, if wears any)	79	Collapse “Good” and “Fair”
	Percentage of people whose vision was described as poor (with glasses or contacts, if wears any)	80	Collapse “Good” and “Fair”
	Percentage of people who have access to healthy foods if they want them	81	Collapse “No, never” and “Sometimes”

Domain	Item	Graph #	Collapsing Logic
Medications	Percentage of people who understand what they take their prescription medications for	83	Collapse “No” and “In-between, or some medications”
Rights and Respect	Percentage of people whose paid support staff treat them with respect	84	Collapse “No, never or rarely” and “Some, or usually”
	Percentage of people whose permission is asked before others enter their home/room (if in group setting)	85	Collapse “Sometimes, rarely or never” and “Usually, but not always”
	Percentage of people who have enough privacy where they live (if in group setting)	87	Collapse “Sometimes, rarely or never” and “Usually, but not always”
	Percentage of people who have access to information about services in their preferred language (if non-English)	90	Collapse “Some information” and “No”
Self-Direction	Percentage of people who can make decisions about what kind of services they get	91	Collapse “No” and “Sometimes, or some services”
	Percentage of people who can make decisions about when they get their services	92	Collapse “No” and “Sometimes, or some services”
	Percentage of people who can make decisions about their paid support staff	93	Collapse “No” and “Sometimes, or some”
Work	Percentage of people who would like a job (if not currently employed)	95	Collapse “Yes” and “Maybe, not sure”
	Percentage of people who would like to do volunteer work (if not currently volunteering)	98	Collapse “Yes” and “Maybe, not sure”
Affordability	Percentage of people who ever have to skip a meal due to financial worries	101	Collapse “Yes, often” and “Sometimes”
