

**National Core Indicators**  
**Aging and Disabilities Adult Consumer Survey**

---

**2018-2019 Vermont Results**

## Preface

The Vermont Agency of Human Services, through its Department of Disabilities, Aging & Independent Living (DAIL), manages a range of long-term services and supports (LTSS) programs including Choices for Care, Developmental Disabilities Services, the Older Americans Act, Money Follows the Person and Traumatic Brain Injury. The mission of DAIL is to make Vermont the best state in which to grow old or live with a disability with dignity, respect and independence.

The Adult Services Division (ASD) within DAIL is responsible for the management and oversight of long-term services and supports that enable older Vermonters and adults with physical disabilities to live in the setting of their choice, including home-based, shared living, residential care, assisted living and nursing facility. To fulfill that responsibility, ASD works in partnership with community organizations that manage LTSS within each region of the state.

Through the use of the National Core Indicators for Aging & Disabilities (NCI-AD) program, Vermont will gain the ability to refine its established performance measures and to use person-reported data to improve the quality of LTSS throughout the state. Additionally, DAIL also participates in the National Core Indicators (NCI) program for developmental disabilities, which will offer Vermont the unique opportunity to compare the quality of life and outcomes across multiple LTSS programs managed within Vermont's Global Commitment to Health 1115 Waiver.

This report provides the first round of NCI-AD data specific to the Choices for Care licensed service care options including nursing facilities and enhanced residential care managed by DAIL/ASD. Information included in this report will allow DAIL/ASD to:

- Globally assess the quality of service provision across the state;
- Assess the impact of the LTSS on quality of life as experienced and reported on by program participants;
- Compare Vermont data with similar programs nationally; and
- To use the information from the survey to improve LTSS for all Vermonters.

## List of Abbreviations Used in This Report

AAA – Area Agency on Aging  
ADRC – Aging and Disability Resource Center  
ALR – Assisted Living Residence  
ASD – Adult Services Division  
BI Section – Background Information Section of NCI-AD Adult Consumer Survey  
CIL – Center for Independent Living  
CPAP – continuous positive airway pressure  
DAIL – Department of Disabilities, Aging & Independent Living  
DDSD – Developmental Disabilities Services Division  
ERC – Enhanced Residential Care  
HCBS – Home and Community-Based Services  
HSRI – Human Services Research Institute  
LTSS – Long-Term Services and Supports  
N – Number of respondents  
N/A – not applicable  
NASUAD – National Association of States United for Aging and Disabilities  
NCI – National Core Indicators  
NCI-AD – National Core Indicators for Aging and Disabilities  
NF – Nursing Facility  
OAA – Older Americans Act  
PACE – Program of All-Inclusive Care for the Elderly  
PCA – Personal Care Assistant  
PCP – Person-Centered Planning  
RCH – Residential Care Home

## Table of Contents

Preface .....	1
List of Abbreviations Used in This Report .....	3
Table of Contents .....	4
<b>What is NCI-AD?</b> .....	21
NCI-AD Adult Consumer Survey .....	21
Survey Overview .....	21
Figure 1. 2018-2019 NCI-AD Domains and Indicators .....	22
Survey Organization .....	25
<b>NCI-AD in Vermont</b> .....	26
Sample .....	27
Figure 2. Number of survey-eligible service recipients, number of analyzed surveys, and calculations of margins of error by program .....	28
Survey Process in Vermont .....	28
Stakeholders .....	29
<b>Organization of Results</b> .....	29
Limitations of Report .....	31
<b>Results</b> .....	32
Community Participation .....	32
Graph 1. Proportion of people who are as active in their community as they would like to be .....	33
Graph 2. Proportion of people who get to do the things they enjoy outside of their home as much as they want to .....	33

Choice and Decision Making .....	34
Graph 3. Proportion of people who are able to choose their roommate (if in group setting and have roommates).....	35
Graph 4. Proportion of people who get up and go to bed when they want to .....	35
Graph 5. Proportion of people who can eat their meals when they want to .....	36
Graph 6. Proportion of people who are able to furnish and decorate their room however they want to (if in group setting) .....	36
Relationships .....	37
Graph 7. Proportion of people who are always able to see or talk to friends and family when they want to (if there are friends and family who do not live with person) .....	38
Satisfaction.....	39
Graph 8. Proportion of people who like where they are living .....	40
Graph 9. Proportion of people who would prefer to live somewhere else .....	40
Graph 10. Proportion of people who like how they spend their time during the day .....	41
Graph 11. Proportion of people whose paid support staff change too often.....	41
Graph 12. Proportion of people whose paid support staff do things the way they want them done.....	42
Service Coordination .....	43
Graph 13. Proportion of people who know whom to contact if they want to make changes to their services.....	44
Graph 14. Proportion of people who know whom to contact if they need help with services or have a complaint.....	44
Graph 15. Proportion of people whose paid support staff show up and leave when they are supposed to .....	45
Graph 16. Proportion of people who have an emergency plan in place.....	45
Graph 17. Proportion of people who want help planning for future changes in their needs.....	46
Graph 18. Proportion of people whose long-term care services meet all their current needs and goals.....	46

Graph 19. Proportion of people whose case manager/care coordinator talked to them about services that might help with their unmet needs and goals (if have unmet needs and goals and know they have case manager/care coordinator) .....	47
Graph 20. Proportion of people whose family member (paid or unpaid) is the person who helps them most often (if anyone provides support on a regular basis) .....	47
Graph 21. Proportion of people who have a family member (paid or unpaid) providing additional assistance (if anyone provides support on a regular basis) .....	48
Graph 22. Proportion of people who have a backup plan if their paid support staff do not show up .....	48
Graph 23. Proportion of people who can reach their case manager/care coordinator when they need to (if know they have case manager/care coordinator) .....	49
Graph 24. Proportion of people who receive information about their services in the language they prefer (if non-English) .....	49
Care Coordination .....	50
Graph 25. Proportion of people who stayed overnight in a hospital or rehabilitation facility in the past year (and were discharged to go home or back to where they live) .....	51
Graph 26. Proportion of people who felt comfortable and supported enough to go home (or where they live) after being discharged from a hospital or rehabilitation facility in the past year .....	51
Graph 27. Proportion of people who had someone follow up with them after being discharged from a hospital or rehabilitation facility in the past year .....	52
Graph 28. Proportion of people who know how to manage their chronic condition(s) .....	52
Graph 29. Proportion of people with concerns about falling or being unstable .....	53
Graph 30. Proportion of people with concerns about falling or being unstable who had somebody talk to them or work with them to reduce the risk .....	53
Access to Community .....	54
Graph 31. Proportion of people who have transportation when they want to do things outside of their home (non-medical) ...	55
Graph 32. Proportion of people who have transportation to get to medical appointments when they need to .....	55

Access to Needed Equipment .....	56
Graph 33. Proportion of people who need grab bars in the bathroom or elsewhere in their home but do not have them .....	57
Graph 34. Proportion of people who have grab bars in the bathroom or elsewhere in their home but need a replacement.....	57
Graph 35. Proportion of people who need bathroom modifications (other than grab bars) but do not have them .....	58
Graph 36. Proportion of people who have bathroom modifications (other than grab bars) but need a replacement .....	58
Graph 37. Proportion of people who need a specialized bed but do not have it .....	59
Graph 38. Proportion of people who have a specialized bed but need a replacement.....	59
Graph 39. Proportion of people who need a ramp or stair lift in or outside the home but do not have it.....	60
Graph 40. Proportion of people who have a ramp or stair lift in or outside the home but need a replacement .....	60
Graph 41. Proportion of people who need some other home modification but do not have it .....	61
Graph 42. Proportion of people who have some other home modification but need a replacement.....	61
Graph 43. Proportion of people who need a walker but do not have it .....	62
Graph 44. Proportion of people who have a walker but need a replacement .....	62
Graph 45. Proportion of people who need a scooter but do not have it.....	63
Graph 46. Proportion of people who have a scooter but need a replacement .....	63
Graph 47. Proportion of people who need a wheelchair but do not have it .....	64
Graph 48. Proportion of people who have a wheelchair but need a replacement .....	64
Graph 49. Proportion of people who need hearing aids but do not have them.....	65
Graph 50. Proportion of people who have hearing aids but need a replacement .....	65
Graph 51. Proportion of people who need glasses but do not have them .....	66
Graph 52. Proportion of people who have glasses but need a replacement.....	66
Graph 53. Proportion of people who need a CPAP machine but do not have it.....	67

Graph 54. Proportion of people who have a CPAP machine but need a replacement .....	67
Graph 55. Proportion of people who need a personal emergency response system but do not have it.....	68
Graph 56. Proportion of people who have a personal emergency response system but need a replacement .....	68
Graph 57. Proportion of people who need an oxygen machine but do not have it .....	69
Graph 58. Proportion of people who have an oxygen machine but need a replacement.....	69
Graph 59. Proportion of people who need some other assistive device but do not have it .....	70
Graph 60. Proportion of people who have some other assistive device but need a replacement.....	70
Safety .....	71
Graph 61. Proportion of people who feel safe at home.....	72
Graph 62. Proportion of people who feel safe around their paid support staff .....	72
Graph 63. Proportion of people who are ever worried for the security of their personal belongings.....	73
Graph 64. Proportion of people whose money was taken or used without their permission in the last 12 months .....	73
Graph 65. Proportion of people who are able to get to safety quickly in case of an emergency like a house fire .....	74
Health Care .....	75
Graph 66. Proportion of people who have gone to the emergency room for any reason in the past year .....	76
Graph 67. Proportion of people whose emergency room visit in the past year was due to falling or losing balance .....	76
Graph 68. Proportion of people whose emergency room visit in the past year was due to tooth or mouth pain .....	77
Graph 69. Proportion of people whose emergency room visit in the past year was due to being unable to see their primary care doctor when they needed to .....	77
Graph 70. Proportion of people who can get an appointment to see their primary care doctor when they need to.....	78
Graph 71. Proportion of people feeling sad or depressed who have talked to someone about it in the past 12 months .....	78
Graph 72. Proportion of people who have had a physical exam or wellness visit in the past year.....	79

Graph 73. Proportion of people who have had a hearing exam in the past year .....	79
Graph 74. Proportion of people who have had a vision exam in the past year .....	80
Graph 75. Proportion of people who have had a flu shot in the past year .....	80
Graph 76. Proportion of people who have had a dental visit in the past year .....	81
Wellness .....	82
Graph 77. Proportion of people whose health was described as poor .....	83
Graph 78. Proportion of people whose health was described as having gotten better compared to 12 months ago .....	83
Graph 79. Proportion of people reported to be forgetting things more often than before in the past 12 months .....	84
Graph 80. Proportion of people who have discussed their forgetting things more often than before with a doctor or a nurse... ..	84
Graph 81. Proportion of people who often feel sad or depressed .....	85
Graph 82. Proportion of people whose hearing was described as poor (with hearing aids, if wears any) .....	85
Graph 83. Proportion of people whose vision was described as poor (with glasses or contacts, if wears any) .....	86
Graph 84. Proportion of people who have access to healthy foods if they want them .....	86
Medications .....	87
Graph 85. Proportion of people who take medications that help them feel less sad or depressed .....	88
Graph 86. Proportion of people who understand what they take their prescription medications for .....	88
Rights and Respect.....	89
Graph 87. Proportion of people whose paid support staff treat them with respect .....	90
Graph 88. Proportion of people whose permission is asked before others enter their home/room (if in group setting).....	90
Graph 89. Proportion of people who are able to lock the doors to their room if they want to (if in group setting) .....	91
Graph 90. Proportion of people who have enough privacy where they live (if in group setting) .....	91
Graph 91. Proportion of people whose visitors are able to come at any time (if in group setting) .....	92

Graph 92. Proportion of people who have access to food at all times of the day (if in group setting) .....	92
Self-Direction .....	93
Graph 93. Proportion of people who can choose or change what kind of services they get .....	94
Graph 94. Proportion of people who can choose or change when and how often they get their services .....	94
Graph 95. Proportion of people who can choose or change their paid support staff if they want to.....	95
Work.....	96
Graph 96. Proportion of people who have a paying job .....	97
Graph 97. Proportion of people who would like a job (if not currently employed).....	97
Graph 98. Proportion of people wanting a job who had someone talk to them about job options .....	98
Graph 99. Proportion of people who do volunteer work.....	98
Graph 100. Proportion of people who would like to do volunteer work (if not currently volunteering).....	99
Everyday Living.....	100
Graph 101. Proportion of people who generally need at least some assistance with everyday activities (such as preparing meals, housework, shopping or taking their medications).....	101
Graph 102. Proportion of people needing at least some assistance with everyday activities who always get enough of that assistance when they need it.....	101
Graph 103. Proportion of people who generally need at least some assistance with self-care (such as bathing, dressing, going to the bathroom, eating, or moving around their home).....	102
Graph 104. Proportion of people needing at least some assistance with self-care who always get enough of that assistance when they need it .....	102
Affordability .....	103
Graph 105. Proportion of people who ever have to skip a meal due to financial worries .....	104
Control .....	105

Graph 106. Proportion of people who never feel in control of their lives .....	106
<b>Appendix A: Rules for Recoding and Collapsing Responses</b> .....	107
Table A1. Outcome Variables – Collapsing Rules .....	107
<b>Appendix B: Un-Collapsed and Unweighted Data by Program</b> .....	112
Demographic Characteristics .....	113
Table 1. Average age (reported for those under 90 years of age) .....	113
Table 2. Age: 90 years and over .....	113
Table 3. Gender .....	113
Table 4. Race and ethnicity .....	113
Table 5. Marital status .....	114

## What is NCI-AD?

The National Core Indicators for Aging and Disabilities© (NCI-AD) are standard measures used across participating states to assess the quality of life and outcomes of seniors and adults with physical disabilities—including traumatic or acquired brain injury—who are accessing publicly-funded services through the Older Americans Act (OAA), Program of All-Inclusive Care for the Elderly (PACE), Medicaid, and/or state-funded programs. The program is coordinated by ADvancing States<sup>1</sup> (formerly the National Association of States United for Aging and Disabilities (NASUAD)) and Human Services Research Institute (HSRI). NCI-AD data are gathered through yearly in-person Adult Consumer Surveys administered by state Aging, Disability, and Medicaid Agencies (or an Agency-contracted vendor) to a sample of at least 400 individuals in each participating state. NCI-AD data measure the performance of states' long-term services and supports (LTSS) systems and service recipient outcomes, helping states prioritize quality improvement initiatives, engage in thoughtful decision making, and conduct futures planning with valid and reliable LTSS data. The program officially launched in the summer of 2015 with 13 participating states<sup>2</sup>. The 2019-2020 project cycle marks its fifth year of implementation, with more than twenty states expected to participate. For more on the development and history of NCI-AD, refer to the [\*National Core Indicators Aging and Disability Adult Consumer Survey: 2015-2016 National Results\*](#) report, available on the NCI-AD website ([www.NCI-AD.org](http://www.NCI-AD.org)).

## NCI-AD Adult Consumer Survey

### Survey Overview

The NCI-AD Adult Consumer Survey is designed to measure outcomes across nineteen broad domains comprising approximately 55 core indicators. Indicators are the standard measures used across states to assess the outcomes of services provided to individuals,

---

<sup>1</sup> ADvancing States (formerly NASUAD) is the membership organization for state Aging, Disability, and Medicaid directors. [www.ADvancingStates.org](http://www.ADvancingStates.org)

<sup>2</sup> Colorado, Delaware, Georgia, Indiana, Kansas, Maine, Minnesota, Mississippi, New Jersey, North Carolina, Ohio, Tennessee, and Texas.

including respect and rights, service coordination, care coordination, employment, health, safety, person-centered planning, etc. An example of an indicator in the Service Coordination domain is: “Proportion of people who receive the services that they need.”

While most indicators correspond to a single survey question, a few refer to clusters of related questions. For example, the indicator “Proportion of people who get needed home modifications, equipment, and assistive devices” in the Access to Needed Equipment domain is addressed by several survey questions that ask about the person’s need for various types of home modifications and assistive devices. Figure 1 below details NCI-AD domains and corresponding indicators.

Figure 1. 2018-2019 NCI-AD Domains and Indicators

Domain	NCI-AD Indicator
<b>Community Participation</b>	Proportion of people who are able to participate in preferred community activities
<b>Choice and Decision-Making</b>	Proportion of people who are involved in making decisions about their everyday lives
<b>Relationships</b>	Proportion of people who are able to see or talk to their friends and families when they want to
<b>Satisfaction</b>	Proportion of people who are satisfied with where they live
	Proportion of people who are satisfied with their paid support staff
	Proportion of people who are satisfied with what they do during the day
<b>Service Coordination</b>	Proportion of people finding out about services from service agencies
	Proportion of people who have access to information about services in their preferred language <sup>3</sup>
	Proportion of people who can get in contact with their case manager when they need to
	Proportion of people who know whom to contact with a complaint or question about their services
	Proportion of people who use a relative as their support person
	Proportion of people whose support staff come when they are supposed to
	Proportion of people who have a backup plan if their paid support staff don’t show up
	Proportion of people who have an emergency plan in place

<sup>3</sup> Indicator previously reported in the “Access” domain.

Domain	NCI-AD Indicator
	Proportion of people who receive the services that they need
	Proportion of people whose case manager talks to them about their unmet needs
	Proportion of people who want help planning for their future service needs
<b>Care Coordination</b>	Proportion of people who had someone work with them to reduce risk of falls <sup>4</sup>
	Proportion of people who feel comfortable going home after being discharged from a hospital or a rehab facility
	Proportion of people who have adequate follow-up after being discharged from a hospital or a rehab facility
	Proportion of people who know how to manage their chronic conditions
<b>Access to Community<sup>5</sup></b>	Proportion of people who have adequate transportation <sup>6</sup>
<b>Access to Needed Equipment<sup>7</sup></b>	Proportion of people who get needed home modifications, equipment, and assistive devices <sup>8</sup>
<b>Safety</b>	Proportion of people who feel safe around their paid support staff
	Proportion of people who are able to get to safety quickly in case of an emergency
	Proportion of people who feel safe at home
	Proportion of people who feel that their belongings are safe
<b>Health Care</b>	Proportion of people who have access to mental health services
	Proportion of people who can get an appointment with their doctor when they need to
	Proportion of people who experience potentially preventable emergency room visits
	Proportion of people who have needed health screenings and vaccinations in a timely manner
<b>Wellness</b>	Proportion of people who have access to healthy foods <sup>9</sup>

<sup>4</sup> Indicator previously reported in the “Safety” domain.

<sup>5</sup> New domain in 2018-2019.

<sup>6</sup> Indicator previously reported in the “Access” domain.

<sup>7</sup> New domain in 2018-2019.

<sup>8</sup> Indicator previously reported in the “Access” domain.

<sup>9</sup> Indicator previously reported in the “Everyday Living” domain.

Domain	NCI-AD Indicator
	Proportion of people in poor health
	Proportion of people with uncorrected poor hearing
	Proportion of people with uncorrected poor vision
	Proportion of people with unaddressed memory concerns
	Proportion of people who often feel sad or depressed
<b>Medications</b>	Proportion of people who take medications to help them feel less sad or depressed
	Proportion of people who know what their prescription medications are for
<b>Rights and Respect</b>	Proportion of people whose paid support staff treat them with respect
	Proportion of people whose basic rights are respected by others
<b>Self-Direction</b>	Proportion of people who can choose or change the kind of services they receive and who provides them
<b>Work</b>	Proportion of people who have a paid job
	Proportion of people who would like a job
	Proportion of people who receive job search assistance
	Proportion of people who volunteer
	Proportion of people who would like to volunteer
<b>Everyday Living</b>	Proportion of people who have adequate support to perform activities of daily living and instrumental activities of daily living
<b>Affordability</b>	Proportion of people who have to cut back on food because of money
<b>Control</b>	Proportion of people who feel in control of their life
<b>Person-Centered Planning (OPTIONAL MODULE)</b>	Proportion of people who are involved in making decisions about their service plan
	Proportion of people whose service planning meetings take place when, where and with whom they want
	Proportion of people whose preferences and needs are discussed in their service planning meetings
	Proportion of people who receive a copy of their service plan after their service planning meetings

Domain	NCI-AD Indicator
	Proportion of people whose service plan reflects what is discussed during their service plan meetings
	Proportion of people whose service plan includes their preferences and choices
	Proportion of people whose supports and services help them live a better life

## Survey Organization

The NCI-AD Adult Consumer Survey tool consists of the Pre-Survey form, the Background Information Section, the Full In-Person Survey, and the Interviewer Feedback Form. An alternative Proxy Version of the In-Person Survey is available for those interviews that need to be conducted with proxies of service recipients instead of the service recipient themselves. Each part of the tool is described below.

**Pre-Survey form:** The Pre-Survey section is an optional form intended to collect information that may be helpful for surveyors to prepare for and schedule the survey meetings. The Pre-Survey form is for surveyor use only; Pre-Survey information is not submitted or used for any data analysis or reporting.

**Background Information (BI) Section:** The BI Section collects demographic and service-related information about the service recipient. To the extent possible, data for the BI Section are derived from states' existing administrative records. BI items not available from state administrative data sources may be collected by surveyors at the end of the survey meeting. Surveyors may collect any missing BI information with the exception of five BI items that must be completed using administrative data sources (person's primary source of LTSS funding/program, LTSS services received through that program, length of receiving services, participation in a self-directed supports option, and legal guardianship status). Each BI item tracks whether data were derived from existing administrative records or collected by surveyors as part of the survey meetings.

**In-Person Survey:** The Full In-Person Survey consists of approximately 90 questions, with related questions grouped together by theme or topic (e.g., a series of questions about employment, a series of questions about support staff, etc.); another 10 questions

comprise the optional Person-Centered Planning module. The Full In-Person Survey is completed face-to-face with the person receiving services. The respondent may ask their proxy (e.g. a family member or a close friend) for assistance with answering some of the questions, if needed. The Full In-Person Survey includes both subjective and objective questions; proxy assistance is only allowed for a defined subset of more objective items.

**Proxy Version:** The Proxy Version is an alternative version of the In-Person Survey. It is used in place of the Full In-Person Survey when the person receiving services is unable or unwilling to provide valid responses or has asked their proxy to complete the survey on their behalf. The Proxy Version includes only the subset of more objective questions from the Full Survey that allow for proxy assistance. Questions in the Proxy Version are rephrased to be in third person, making it clear their subject is the person receiving services and not the proxy respondent. Surveyors must meet with the service recipient face-to-face and attempt to interview them; only after the in-person attempt has been made can the proxy be surveyed instead of the service recipient.

**Interviewer Feedback Form:** The Interviewer Feedback Form is completed by surveyors after the survey meeting is concluded. It collects information about the survey meeting itself, such as when/where the meeting took place, who was present, the respondent's level of comprehension, etc. Surveyors are also asked to provide any feedback they may have about the survey tool itself or the survey process overall.

## NCI-AD in Vermont

Department of Disabilities, Aging & Independent Living (DAIL) Adult Services Division (ASD), in partnership with ADvancing States (formerly NASUAD) and HSRI, implemented the 2018-2019 NCI-AD Adult Consumer Survey. DAIL recognized the need for an independent assessment of Vermont's publicly funded home and community-based services and LTSS for the programs served through ASD and the programs served through the Developmental Disabilities Services Division (DDSD). DDSD has used the National Core Indicators (NCI) In-Person Survey for its developmental disability program for several years; in 2017-2018 ASD launched the NCI-AD Adult Consumer Survey to allow comparison between LTSS programs. In 2017 DAIL contracted with Vital Research, a national

survey group, to conduct the in-person interviews for both NCI and NCI-AD. Data from the NCI-AD and NCI projects will be used to support Vermont's efforts to strengthen LTSS policy, inform quality assurance activities, and improve the quality of life for Vermont's LTSS participants.

## Sample

The total number of NCI-AD Adult Consumer Surveys conducted in Vermont and included for analysis in 2018-2019 was four hundred twenty-six (Total N=426). Two programs – Enhanced Residential Care and Nursing Facilities – were included in Vermont's 2018-2019 NCI-AD survey sample.

**Enhanced Residential Care:** Long term services and supports for individuals who are 18 years and over and need nursing home level of care. Enhanced Residential Care (ERC) is a daily, bundled package providing 24-hour care and supervision to individuals residing in an approved Vermont Licensed Level III Residential Care Home (RCH) or Assisted Living Residence (ALR). Services include personal care, meal preparation, nursing oversight, medication management, activities, laundry and housekeeping, and case management. One hundred seventy-nine people (N=179) from this program were interviewed and included for analysis.

**Nursing Facilities:** Nursing Facility (NF) services are a daily, bundled package of services provided 24-hour nursing care, supervision, therapies, personal care, meals, nutrition services, activities and social services to individuals residing in an approved Vermont Licensed Nursing Facility. Two hundred forty-seven people (N=247) from this program were interviewed and included for analysis.

Figure 2 below summarizes programs included in Vermont's NCI-AD survey sample, the number of survey-eligible service recipients in each and the corresponding number of conducted surveys included for analysis. Also included are calculations of margin of error for each program under two scenarios: assuming a very conservative 0.5 distribution of responses and assuming a somewhat less conservative 0.7 distribution of responses. Using the 0.5 distribution of responses is the most conservative distribution assumption for calculating margins of error that can be made and is usually used when no prior information is available about true population

response distributions. When some prior information about distributions of responses in the population is available, it can be used for calculating less conservative margins of error. Based on distributions observed in previously collected NCI-AD data, it is reasonable to assume a somewhat less conservative population response distribution of 0.7 for calculating margins of error. Calculations in both scenarios use the total number of analyzed surveys in each program. It is important to note that the actual number of valid responses to an individual survey item may be smaller than the total number of analyzed surveys. This is explained in more detail in the “Organization of Results” section below.

Figure 2. Number of survey-eligible service recipients, number of analyzed surveys, and calculations of margins of error by program.

Program	Number of analyzed surveys	Number of eligible participants	Margin of error (MoE) and confidence level (CL), assuming 0.7 distribution	Margin of error (MoE) and confidence level (CL), assuming 0.5 distribution
Enhanced Residential Care	179	465	5.3% MoE, 95% CL	5.8% MoE, 95% CL
Nursing Facilities	247	1,697	5.3% MoE, 95% CL	5.8% MoE, 95% CL
<b>Total</b>	<b>426</b>	<b>2,162</b>	<b>3.9% MoE, 95% CL</b>	<b>4.3% MoE, 95% CL</b>

## Survey Process in Vermont

DAIL contracted with Vital Research to hire and manage local interviewers to conduct the NCI-AD in-person survey. DAIL, Vital Research, ADvancing States (NASUAD at the time), and HSRI staff conducted a two-day training with interviewers prior to survey implementation. The training included a detailed review of the NCI-AD survey tool, general and population-specific surveying techniques, procedures for scheduling interviews and obtaining consent, overview of the NCI-AD project, guidance for follow-up in cases of unmet needs and/or abuse, neglect or exploitation, mock interviewing practice sessions, and data entry procedures. Following the training session, interviews began in February and continued through the spring. Final data from the interviews were sent to HSRI for analysis and reporting.

Vermont used NCI-AD's optional module on person-centered planning (PCP) in all four of its programs surveyed. In addition, Vermont chose to add 4 state-specific questions to the standard NCI-AD Survey.

## Stakeholders

Vermont DAIL embraces the understanding that the community we work to build is one which respects the unique strengths and gifts of each of us, celebrates the inclusion of all, and is inherently stronger when each community member is a part of the whole. In this effort, DAIL maintains its focus on outcomes for individual participants. Conducting the NCI-AD Adult Consumer Survey in our nursing facilities and enhanced residential care service options parallels the outcome work and NCI In-Person Survey that DAIL is already implementing for its developmental disability services. Process enhancement and improvement complements our examination of our outcome measures; where we see opportunities to improve our processes to achieve better results, we embrace them and engage staff and stakeholders alike in the assessment and visualization. We anticipate a continued focus on strengthening and improving our systems and look forward to working with the administration, the legislature and our stakeholders across the board to identify where to best put our energies and what changes are most critical to Vermonterers.

## Organization of Results

The following pages of the report presents findings from Vermont's 2018-2019 NCI-AD Adult Consumer Survey data collection cycle. Results are grouped by domain and are presented in chart format. Charts show results for individual survey items broken out by each program. The number of people (N) in each program that gave valid responses to that survey item are also shown. The number of valid responses to an item may be smaller than the total number of analyzed surveys, for the following reasons:

- Certain questions in the survey can only be asked of the service recipient – i.e. proxy respondents for these questions are not allowed. These questions have a smaller number of responses because they are contained only in the full In-Person Survey, whereas the total number of analyzed surveys also includes cases when the Proxy Version was used.

- Only valid responses are included in both the denominator and the numerator when calculating proportions. Unclear, refused and, for most items, “don’t know” responses are excluded.
- The survey contains several skip logic patterns. This means that depending on the response to a previous survey item, a question may or may not be asked, as appropriate. When an item is skipped due to skip logic, the survey case does not contribute to the calculations for the item.

*Please note:* Extreme caution should be used when interpreting results where the number of valid responses is small. Each program’s valid number of responses (valid Ns) is shown in every chart and table in this report. In addition to displaying valid number of responses, charts also use an asterisk to indicate Ns smaller than 20. Responses smaller than 20 should not be used as a basis for firm conclusions and should be treated as suggestive and informational only.

Each chart also contains Vermont’s weighted state average, as well as the total number of observed valid responses for that survey item. A weighted state average takes into account whether the sampling strategy proportionally oversampled one or more of the state’s programs; its calculation effectively “re-balances” the oversampled programs to produce an average one would expect if they were represented proportionally relative to the populations they serve. Vermont’s sampling design did include oversampling of some of its programs – i.e. some programs constituted a larger proportion of the survey sample than they did as proportion of total population of survey-eligible service recipients. To account for these programs being proportionally over-represented in the state’s survey data, statistical weights were developed and applied to calculate Vermont’s weighted state averages presented in the charts. For exact calculations of weights, please contact the NCI-AD project team.

Charts present results using binary data indicating presence or absence of the outcome. For the purposes of analysis, most survey items with three or more possible response options were recoded to form binary variables (i.e. responses were collapsed, for example, an “always” response combined with a “most of the time” response). For details about recoded items and the rules on collapsing response options, please refer to Appendix A. Unless otherwise stated, “don’t know” and unclear/refused responses were excluded from both the numerator and denominator.

Un-collapsed and unweighted data showing frequencies of all response options by program are shown in tabular format in Appendix B. These tables contain all response options, including “don’t know” and unclear/refused/no response categories. Tables also contain Vermont’s unweighted overall sample averages for all response options. Please note that the “sample averages” in tables in Appendix B are simple (unweighted) averages that didn’t employ weights in their calculations and may therefore be slightly different from the corresponding weighted state averages shown in the charts.

Data from state-specific questions that Vermont chose to add to the standard NCI-AD Survey are shown in Appendix C. Vermont’s data from NCI-AD’s optional PCP module are shown in Appendix D.

## Limitations of Report

This report contains survey results related to the quality and outcomes of LTSS in Vermont. However, it does not provide benchmarks for acceptable or unacceptable levels of performance. Rather, it is up to state staff, leadership, and other stakeholders to assess information contained in this report and establish priorities. This report is intended to be one mechanism to assess the current state of Vermont’s LTSS system and identify areas that are working well and areas that could use improvement. The charts in this report allow the reader to compare average outcomes between Vermont’s programs and the state overall. State leaders, public managers, policy-makers and community stakeholders can use this information to decide whether a program’s result relative to another program or to the state average suggests further investigation or intervention is necessary. However, discretion should be used when comparing a program’s result relative to another program, as it is important to keep in mind the potential differences as well as similarities amongst program participants and the programs themselves.

# Results

## Community Participation

People are able to participate in preferred activities outside of home when and with whom they want.

There is one Community Participation indicator measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who are able to participate in preferred community activities.

There are three<sup>10</sup> survey items that correspond to the Community Participation domain.

Un-collapsed data are shown in Appendix B.

---

<sup>10</sup> Data for one item are presented in Appendix B only.

Graph 1. Proportion of people who are as active in their community as they would like to be

Graph 2. Proportion of people who get to do the things they enjoy outside of their home as much as they want to

## Choice and Decision Making

People are involved in making decisions about their everyday lives and with whom they spend their time.

There is one Choice and Decision-Making indicator measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who are involved in making decisions about their everyday lives.

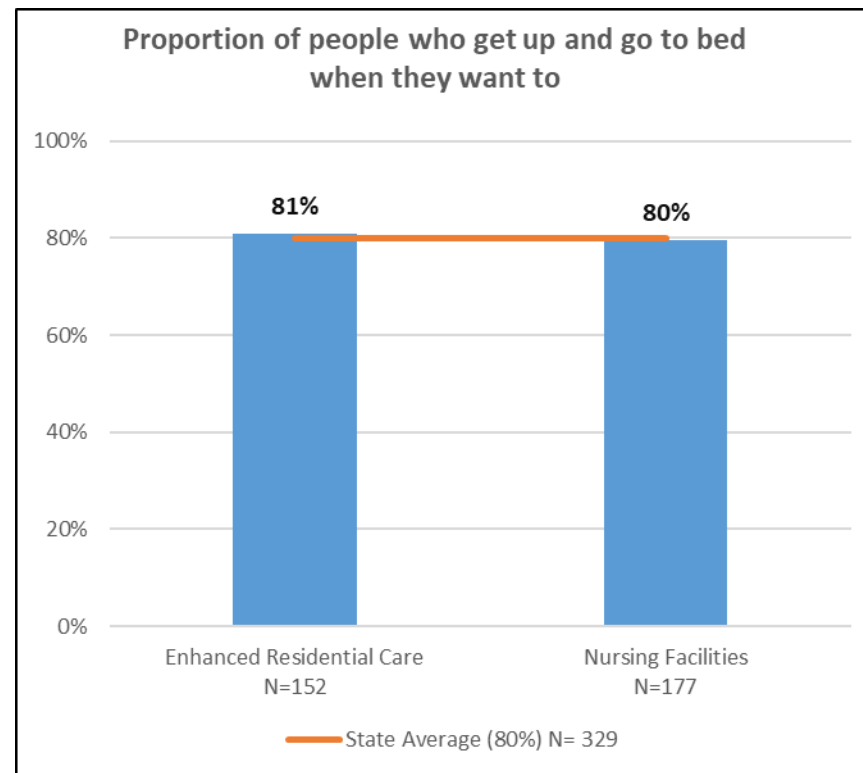

There are four survey items that correspond to the Choice and Decision-Making domain.

Un-collapsed data are shown in Appendix B.

Graph 3. Proportion of people who are able to choose their roommate (if in group setting<sup>11</sup> and have roommates)

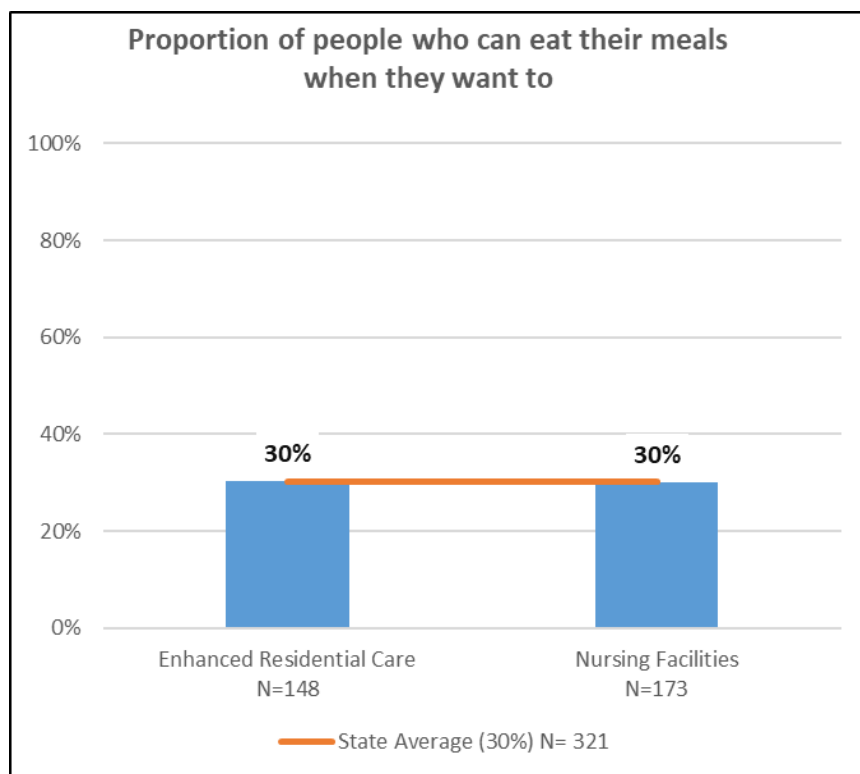

Graph 4. Proportion of people who get up and go to bed when they want to

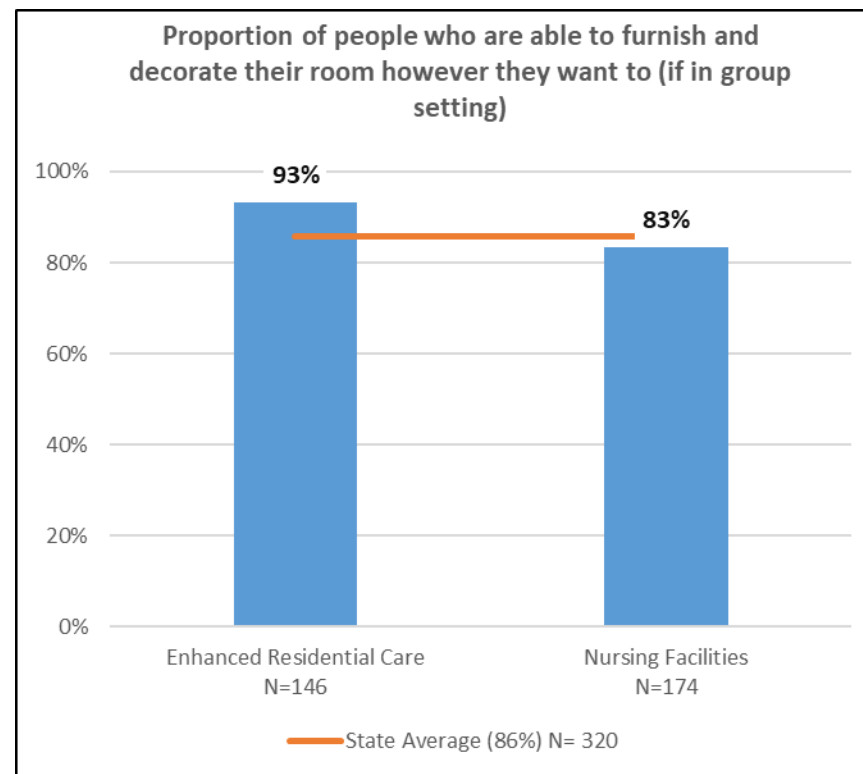

<sup>11</sup> Group/adult family/foster/host home, assisted living/residential care facility, nursing facility/nursing home

Graph 5. Proportion of people who can eat their meals when they want to

<sup>12</sup> Group/adult family/foster/host home, assisted living/residential care facility, nursing facility/nursing home

Graph 6. Proportion of people who are able to furnish and decorate their room however they want to (if in group setting<sup>12</sup><sup>13</sup>)

<sup>13</sup> Analysis changed in 2018-2019 – “in all ways” is now combined with “in most ways”

## Relationships

People have friends and relationships and do not feel lonely.

There is one Relationship indicator measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who are able to see or talk to their friends and families when they want to.

There are two<sup>14</sup> survey items that correspond to the Relationship domain.

Un-collapsed data are shown in Appendix B.

---

<sup>14</sup> Data for one item are presented in Appendix B only.

Graph 7. Proportion of people who are always able to see or talk to friends and family when they want to (if there are friends and family who do not live with person)

## Satisfaction

People are satisfied with their everyday lives – where they live, who works with them, and what they do during the day.

There are three Satisfaction indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who are satisfied with where they live.
2. Proportion of people who are satisfied with what they do during the day.
3. Proportion of people who are satisfied with their paid support staff.

There are seven<sup>15</sup> survey items that correspond to the Satisfaction domain.

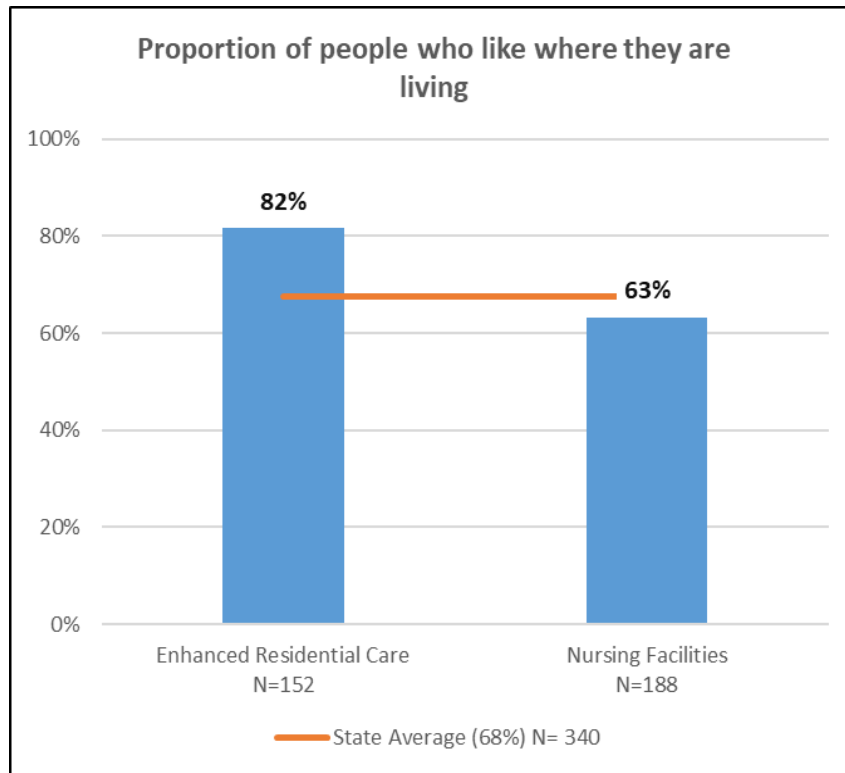

Un-collapsed data are shown in Appendix B.

---

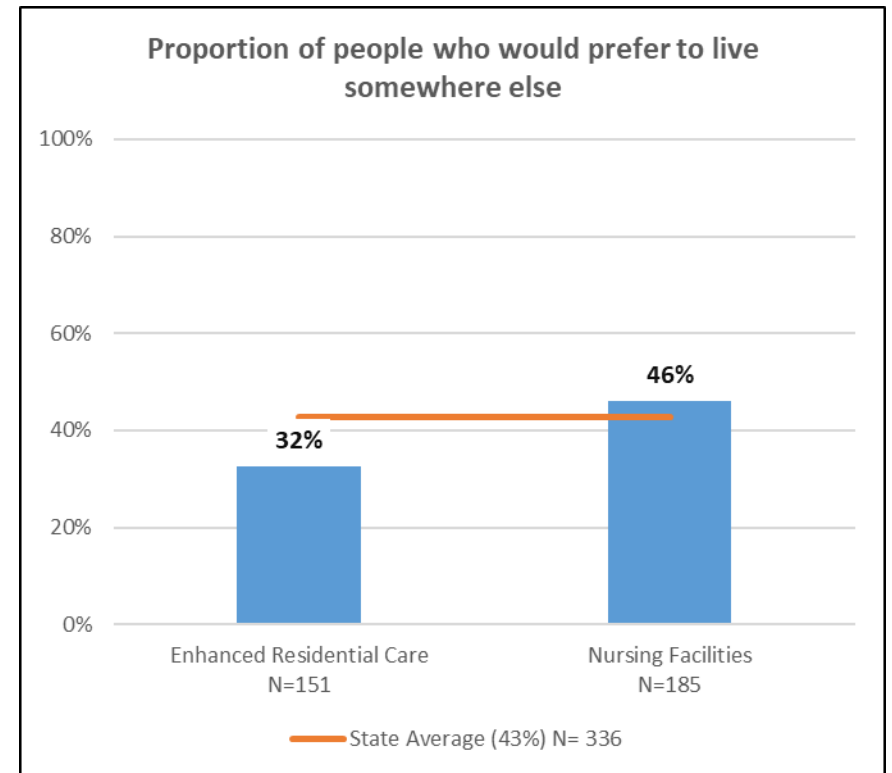

<sup>15</sup> Data for two items are presented in Appendix B only.

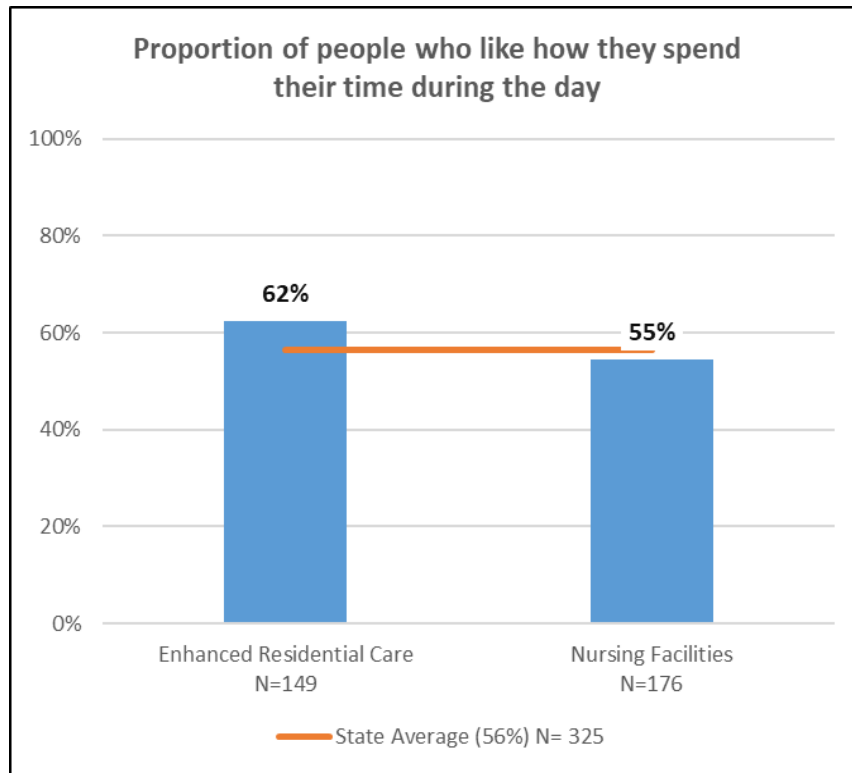

Graph 8. Proportion of people who like where they are living

Graph 9. Proportion of people who would prefer to live somewhere else

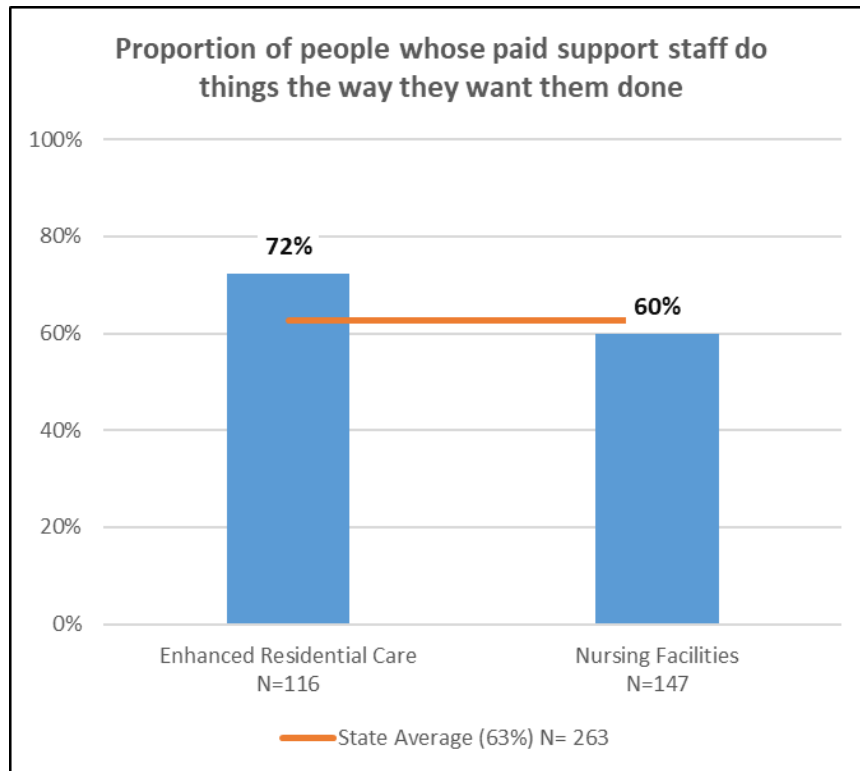

Graph 10. Proportion of people who like how they spend their time during the day

Graph 11. Proportion of people whose paid support staff change too often

Graph 12. Proportion of people whose paid support staff do things the way they want them done

## Service Coordination

Service coordinators are accessible, responsive, and support the person's participation in service planning and the person receives needed services.

There are eleven Service Coordination indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who know whom to contact with a complaint or question about their services.
2. Proportion of people whose case manager talks to them about their unmet needs.
3. Proportion of people who can get in contact with their case manager when they need to.
4. Proportion of people who receive the services that they need.
5. Proportion of people finding out about services from service agencies.
6. Proportion of people who want help planning for their future service needs.
7. Proportion of people who have an emergency plan in place.
8. Proportion of people whose support staff come when they are supposed to.
9. Proportion of people who use a relative as their support person.
10. Proportion of people who have a backup plan if their paid support staff don't show up.
11. Proportion of people who have access to information about services in their preferred language<sup>16</sup>.

There are sixteen<sup>17</sup> survey items that correspond to the Service Coordination domain.

Un-collapsed data are shown in Appendix B.

---

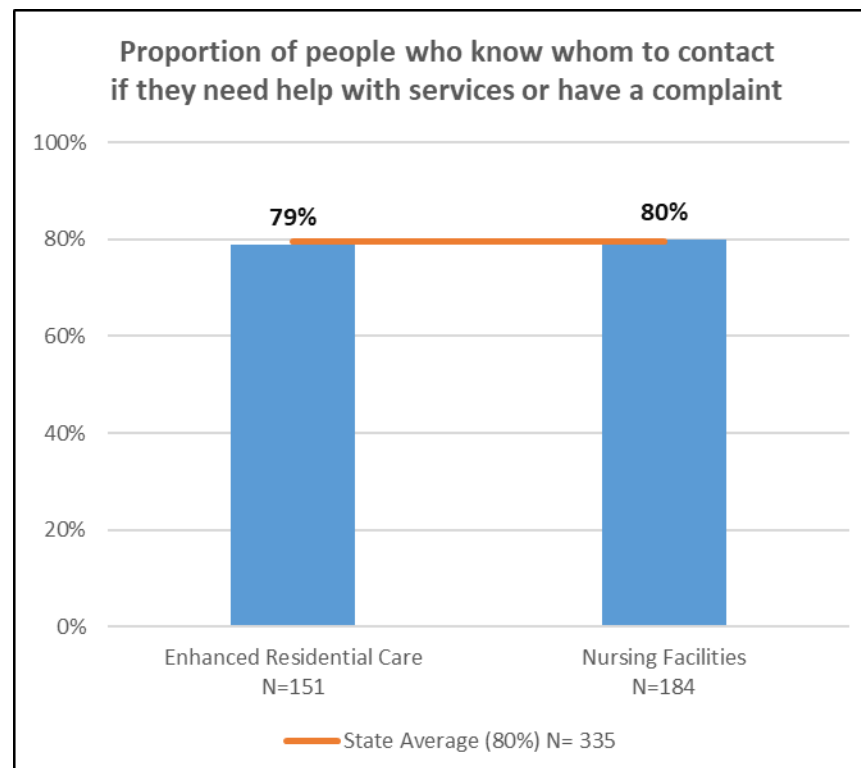

<sup>16</sup> Indicator previously reported in the "Access" domain.

<sup>17</sup> Data for four items are presented in Appendix B only.

Graph 13. Proportion of people who know whom to contact if they want to make changes to their services

Graph 14. Proportion of people who know whom to contact if they need help with services or have a complaint<sup>18</sup>

<sup>18</sup> New item added in 2018-2019.

Graph 15. Proportion of people whose paid support staff show up and leave when they are supposed to

Graph 16. Proportion of people who have an emergency plan in place

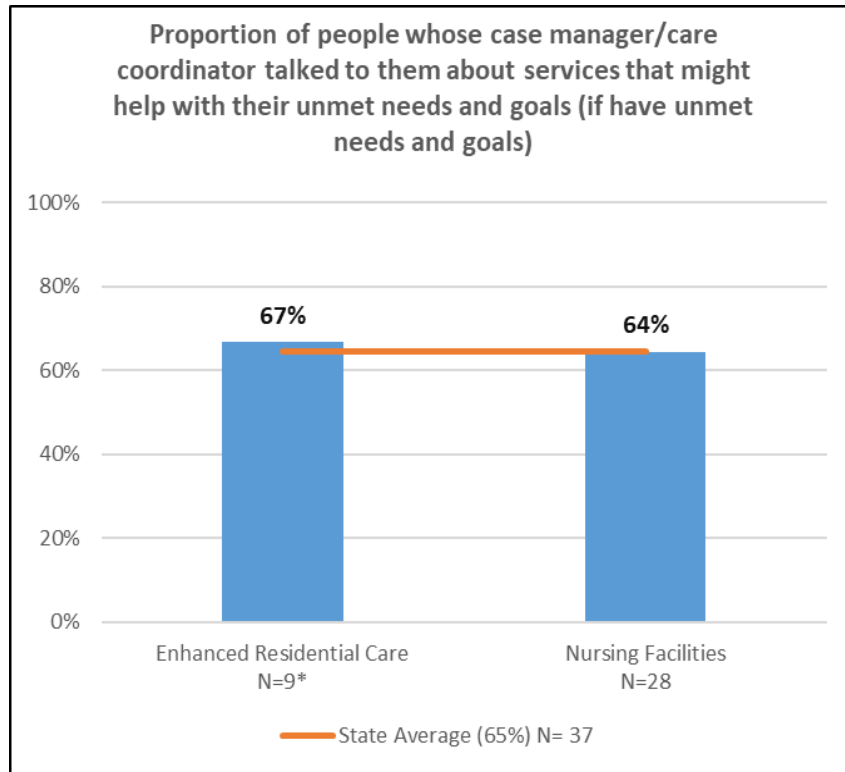

Graph 17. Proportion of people who want help planning for future changes in their needs

Graph 18. Proportion of people whose long-term care services meet all their current needs and goals

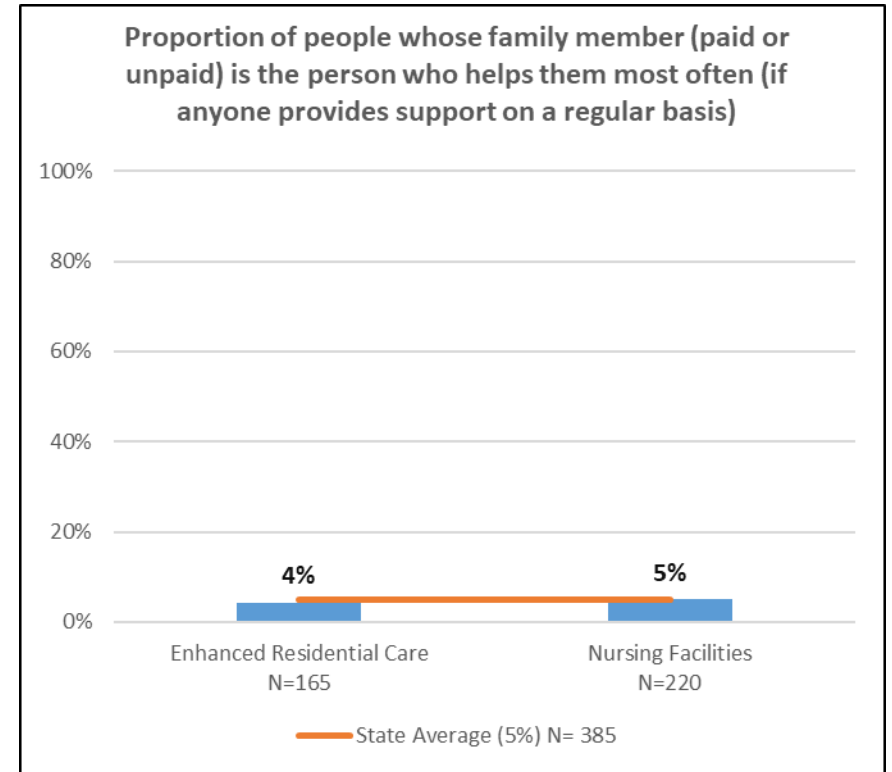

Graph 19. Proportion of people whose case manager/care coordinator talked to them about services that might help with their unmet needs and goals (if have unmet needs and goals and know they have case manager/care coordinator)

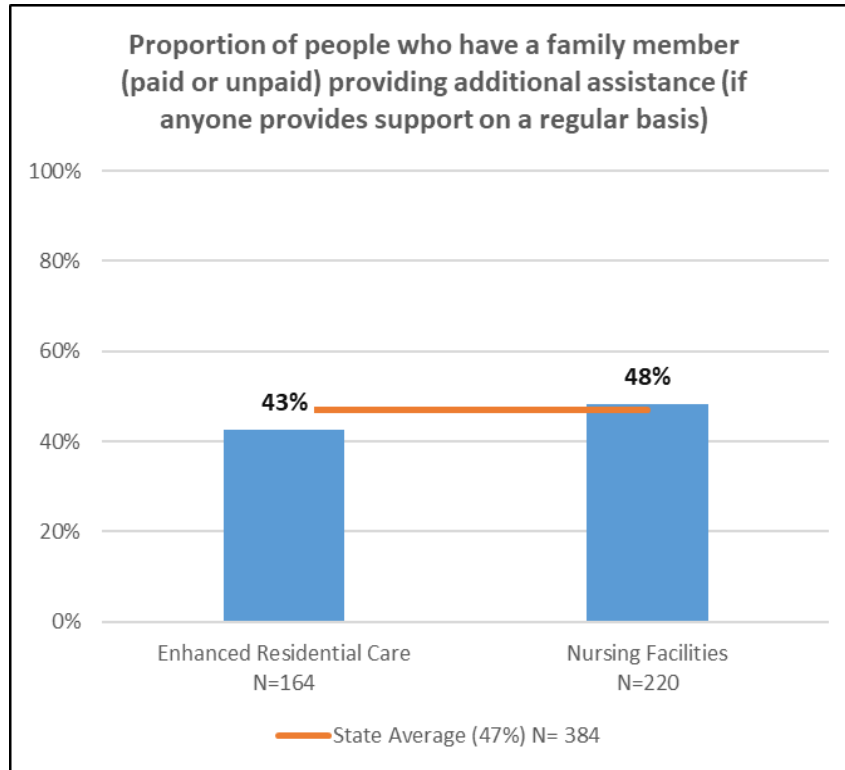

\* Very small number of responses

Graph 20. Proportion of people whose family member (paid or unpaid) is the person who helps them most often (if anyone provides support on a regular basis)

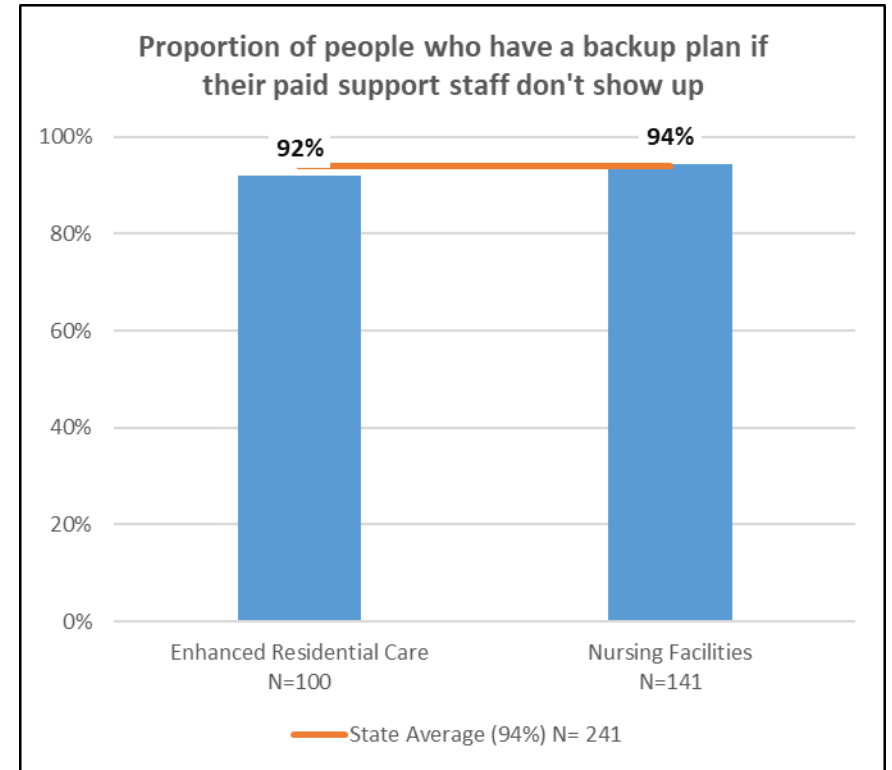

Graph 21. Proportion of people who have a family member (paid or unpaid) providing additional assistance (if anyone provides support on a regular basis)

Graph 22. Proportion of people who have a backup plan if their paid support staff do not show up

Graph 23. Proportion of people who can reach their case manager/care coordinator when they need to (if know they have case manager/care coordinator)

Graph 24. Proportion of people who receive information about their services in the language they prefer (if non-English) <sup>19</sup>

\* Very small number of responses

<sup>19</sup> Item previously reported in the "Access" domain.

## Care Coordination

Individuals are provided appropriate coordination of care.

There are four Care Coordination indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who feel comfortable going home after being discharged from a hospital or a rehab facility.
2. Proportion of people who have adequate follow-up after being discharged from a hospital or a rehab facility.
3. Proportion of people who know how to manage their chronic conditions.
4. Proportion of people who had someone work with them to reduce risk of falls<sup>20</sup>.

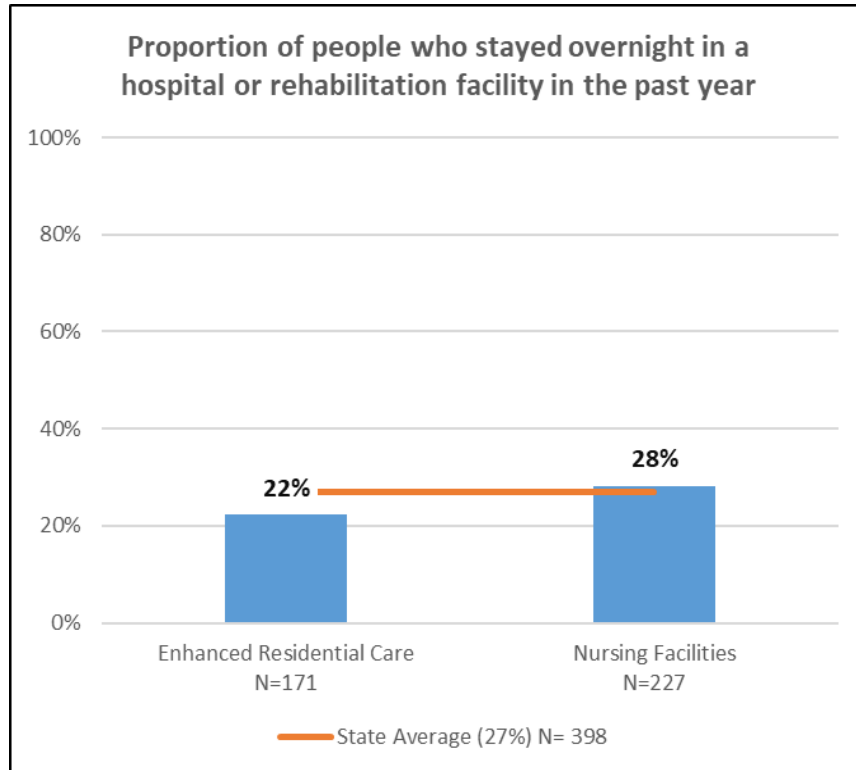

There are six survey items that correspond to the Care Coordination domain.

Un-collapsed data are shown in Appendix B.

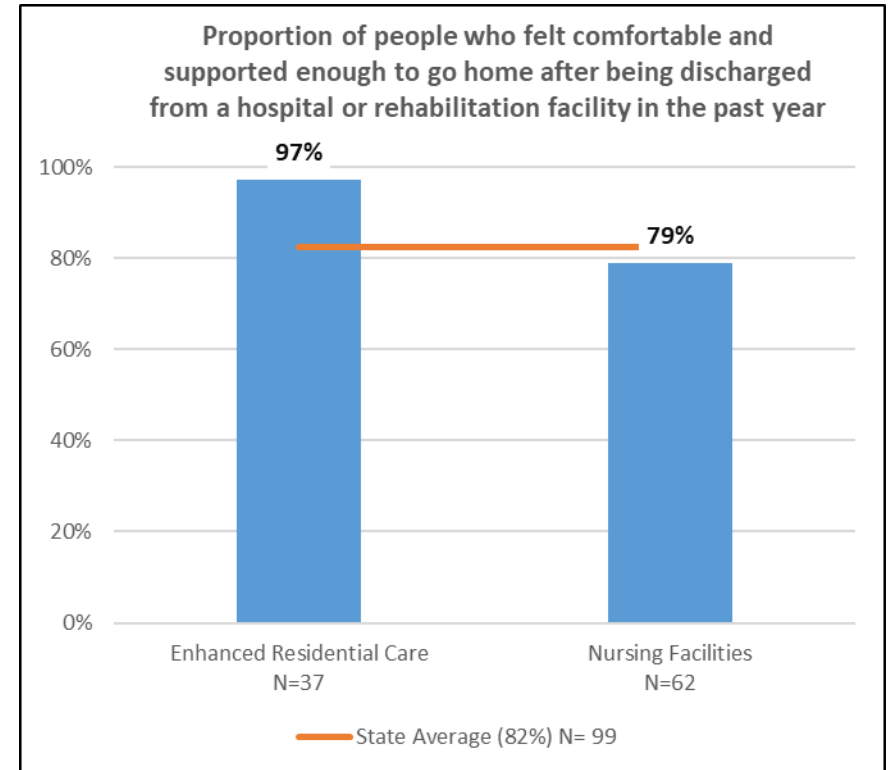

---

<sup>20</sup> Indicator previously reported in the “Safety” domain.

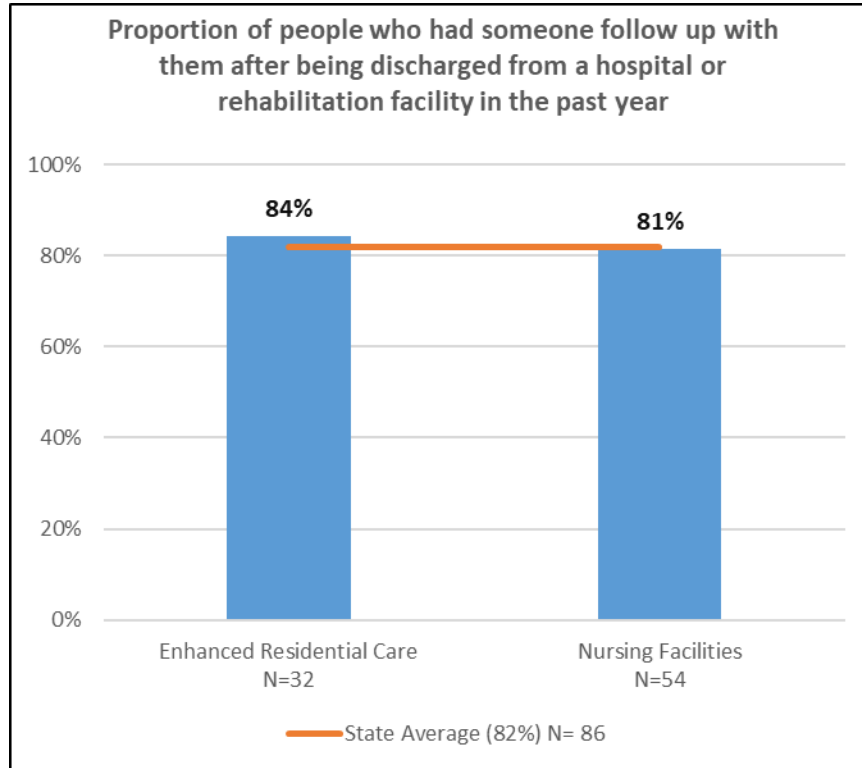

Graph 25. Proportion of people who stayed overnight in a hospital or rehabilitation facility in the past year (and were discharged to go home or back to where they live)

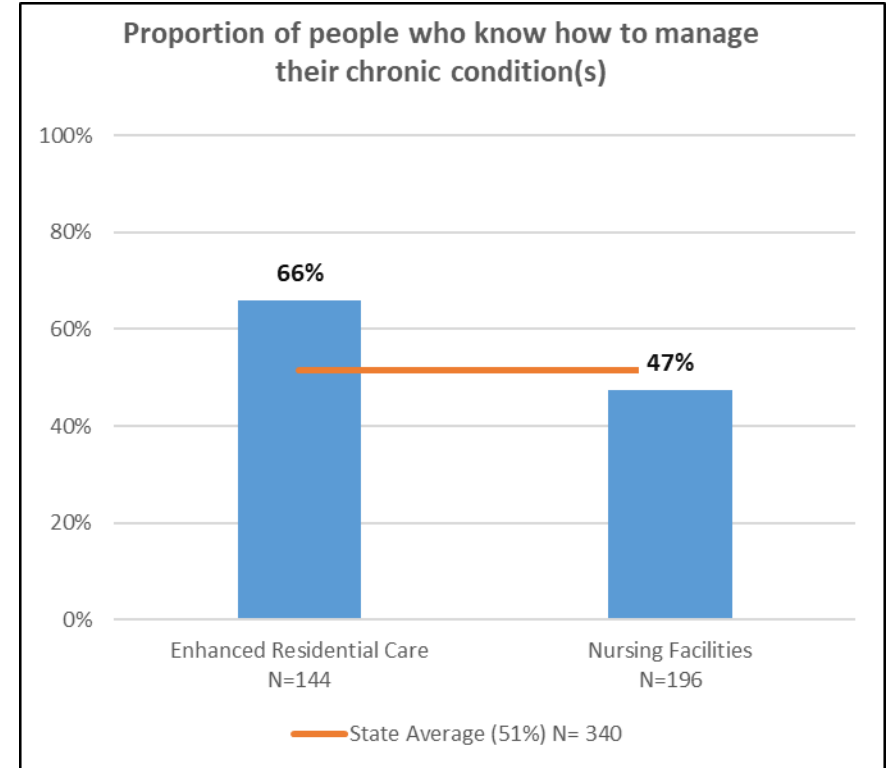

Graph 26. Proportion of people who felt comfortable and supported enough to go home (or where they live) after being discharged from a hospital or rehabilitation facility in the past year

Graph 27. Proportion of people who had someone follow up with them after being discharged from a hospital or rehabilitation facility in the past year

Graph 28. Proportion of people who know how to manage their chronic condition(s)

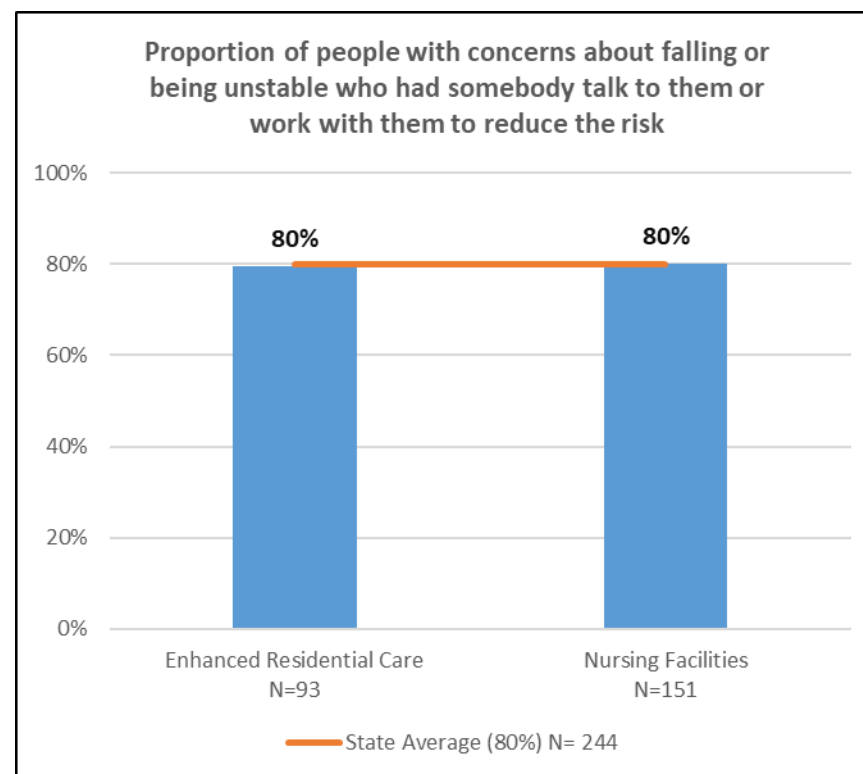

Graph 29. Proportion of people with concerns about falling or being unstable<sup>21</sup>

<sup>21</sup> Item previously reported in the “Safety” domain.

Graph 30. Proportion of people with concerns about falling or being unstable who had somebody talk to them or work with them to reduce the risk<sup>22</sup>

<sup>22</sup> Item previously reported in the “Safety” domain.

## Access to Community<sup>23</sup>

Publicly funded services facilitate individuals' access to community.

There is one Access to Community indicator measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who have adequate transportation<sup>24</sup>.

There are two survey items that correspond to the Access to Community domain.

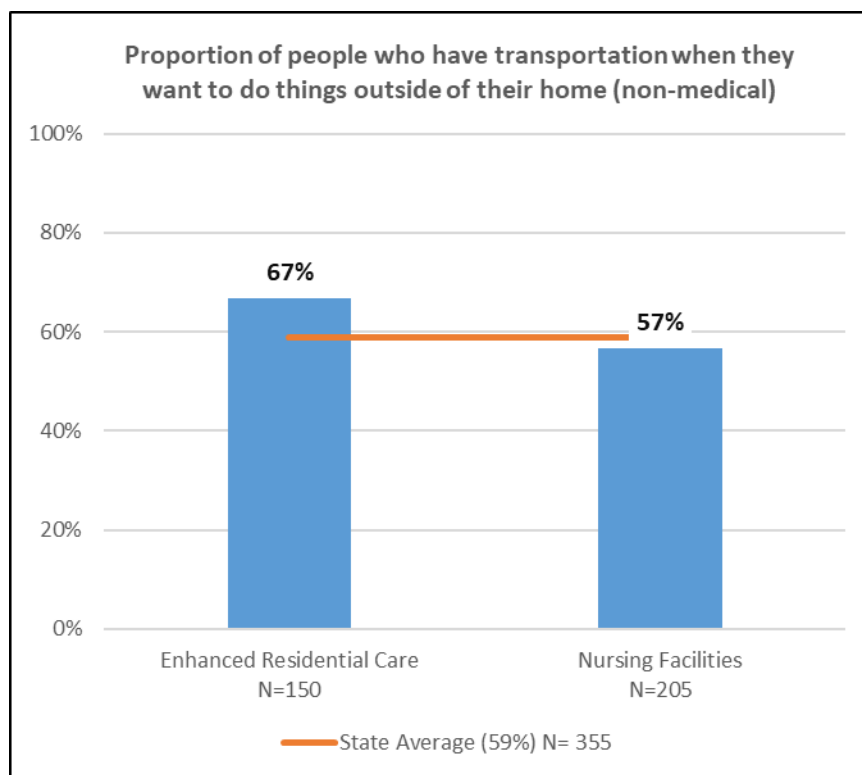

Un-collapsed data are shown in Appendix B.

---

<sup>23</sup> New domain in 2018-2019.

<sup>24</sup> Indicator previously reported in the "Access" domain.

Graph 31. Proportion of people who have transportation when they want to do things outside of their home (non-medical) <sup>25</sup>

<sup>25</sup> Item previously reported in the “Access” domain.

Graph 32. Proportion of people who have transportation to get to medical appointments when they need to <sup>26</sup>

<sup>26</sup> Item previously reported in the “Access” domain.

## Access to Needed Equipment<sup>27</sup>

People have access to needed home modifications and assistive equipment.

There is one Access to Needed Equipment indicator measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who get needed home modifications, equipment, and assistive devices<sup>28</sup>.

There are two survey items that correspond to the Access to Needed Equipment domain.

Un-collapsed data are shown in Appendix B.

---

<sup>27</sup> New domain in 2018-2019.

<sup>28</sup> Indicator previously reported in the “Access” domain.

Graph 33. Proportion of people who need grab bars in the bathroom or elsewhere in their home but do not have them<sup>29</sup>

<sup>29</sup> Item previously reported in the “Access” domain.

Graph 34. Proportion of people who have grab bars in the bathroom or elsewhere in their home but need a replacement<sup>30</sup>

<sup>30</sup> Item previously reported in the “Access” domain.

Graph 35. Proportion of people who need bathroom modifications (other than grab bars) but do not have them<sup>31</sup>

<sup>31</sup> Item previously reported in the "Access" domain.

Graph 36. Proportion of people who have bathroom modifications (other than grab bars) but need a replacement<sup>32</sup>

<sup>47</sup> Item previously reported in the “Access” domain.

Graph 52. Proportion of people who have glasses but need a replacement<sup>48</sup>

<sup>48</sup> Item previously reported in the “Access” domain.

Graph 53. Proportion of people who need a CPAP machine but do not have it<sup>49</sup>

<sup>49</sup> Item previously reported in the "Access" domain.

Graph 54. Proportion of people who have a CPAP machine but need a replacement<sup>50</sup>

<sup>50</sup> Item previously reported in the "Access" domain.

Graph 55. Proportion of people who need a personal emergency response system but do not have it<sup>51</sup>

<sup>51</sup> Item previously reported in the "Access" domain.

Graph 56. Proportion of people who have a personal emergency response system but need a replacement<sup>52</sup>

<sup>52</sup> Item previously reported in the "Access" domain.

Graph 57. Proportion of people who need an oxygen machine but do not have it<sup>53</sup>

<sup>53</sup> New item added in 2018-2019.

Graph 58. Proportion of people who have an oxygen machine but need a replacement<sup>54</sup>

<sup>54</sup> New item added in 2018-2019.

Graph 59. Proportion of people who need some other assistive device but do not have it<sup>55</sup>

<sup>55</sup> Item previously reported in the “Access” domain.

Graph 60. Proportion of people who have some other assistive device but need a replacement<sup>56</sup>

<sup>56</sup> Item previously reported in the “Access” domain.

## Safety

People feel safe from abuse, neglect, and injury.

There are four Safety indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who feel safe at home.
2. Proportion of people who feel safe around their paid support staff.
3. Proportion of people who feel that their belongings are safe.
4. Proportion of people who are able to get to safety quickly in case of an emergency.

There are five survey items that correspond to the Safety domain.

Un-collapsed data are shown in Appendix B.

Graph 61. Proportion of people who feel safe at home

Graph 62. Proportion of people who feel safe around their paid support staff

Graph 63. Proportion of people who are ever worried for the security of their personal belongings

Graph 64. Proportion of people whose money was taken or used without their permission in the last 12 months

Graph 65. Proportion of people who are able to get to safety quickly in case of an emergency like a house fire

## Health Care

### People secure needed health services.

There are four Health Care indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who experience potentially preventable emergency room visits.
2. Proportion of people who have needed health screenings and vaccinations in a timely manner.
3. Proportion of people who can get an appointment with their doctor when they need to.
4. Proportion of people who have access to mental health services.

There are five survey items that correspond to the Health Care domain.

Un-collapsed data are shown in Appendix B.

Graph 66. Proportion of people who have gone to the emergency room for any reason in the past year

Graph 67. Proportion of people whose emergency room visit in the past year was due to falling or losing balance

Graph 68. Proportion of people whose emergency room visit in the past year was due to tooth or mouth pain

Graph 69. Proportion of people whose emergency room visit in the past year was due to being unable to see their primary care doctor when they needed to<sup>57</sup>

<sup>57</sup> New item added in 2018-2019.

Graph 70. Proportion of people who can get an appointment to see their primary care doctor when they need to

Graph 71. Proportion of people feeling sad or depressed who have talked to someone about it in the past 12 months

Graph 72. Proportion of people who have had a physical exam or wellness visit in the past year

Graph 73. Proportion of people who have had a hearing exam in the past year

Graph 74. Proportion of people who have had a vision exam in the past year

Graph 75. Proportion of people who have had a flu shot in the past year

Graph 76. Proportion of people who have had a dental visit in the past year

## Wellness

People are supported to maintain health.

There are six Wellness indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people in poor health.
2. Proportion of people with unaddressed memory concerns.
3. Proportion of people with uncorrected poor hearing.
4. Proportion of people with uncorrected poor vision.
5. Proportion of people who often feel sad or depressed.
6. Proportion of people who have access to healthy foods<sup>58</sup>.

There are eight survey items that correspond to the Wellness domain.

Un-collapsed data are shown in Appendix B.

---

<sup>58</sup> Indicator previously reported in the “Everyday Living” domain.

Graph 77. Proportion of people whose health was described as poor

Graph 78. Proportion of people whose health was described as having gotten better compared to 12 months ago

Graph 79. Proportion of people reported to be forgetting things more often than before in the past 12 months

Graph 80. Proportion of people who have discussed their forgetting things more often than before with a doctor or a nurse

Graph 81. Proportion of people who often feel sad or depressed

Graph 82. Proportion of people whose hearing was described as poor (with hearing aids, if wears any)

Graph 83. Proportion of people whose vision was described as poor (with glasses or contacts, if wears any)

Graph 84. Proportion of people who have access to healthy foods if they want them<sup>59</sup>

<sup>59</sup> Item previously reported in the “Everyday Living” domain.

## Medications

Medications are managed effectively and appropriately.

There are two Medication indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who take medications to help them feel less sad or depressed.
2. Proportion of people who know what their prescription medications are for.

There are two survey items that correspond to the Medication domain.

Un-collapsed data are shown in Appendix B.

Graph 85. Proportion of people who take medications that help them feel less sad or depressed

Graph 86. Proportion of people who understand what they take their prescription medications for

## Rights and Respect

People receive the same respect and protections as others in the community.

There are two Rights and Respect indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people whose basic rights are respected by others.
2. Proportion of people whose paid support staff treat them with respect.

There are six survey items that correspond to the Rights and Respect domain.

Un-collapsed data are shown in Appendix B.

Graph 87. Proportion of people whose paid support staff treat them with respect

Graph 88. Proportion of people whose permission is asked before others enter their home/room (if in group setting)<sup>60</sup>

<sup>60</sup> Group/adult family/foster/host home, assisted living/residential care facility, nursing facility/nursing home

Graph 89. Proportion of people who are able to lock the doors to their room if they want to (if in group setting)<sup>61</sup>

<sup>61</sup> Group/adult family/foster/host home, assisted living/residential care facility, nursing facility/nursing home

Graph 90. Proportion of people who have enough privacy where they live (if in group setting)<sup>62</sup>

<sup>62</sup> Group/adult family/foster/host home, assisted living/residential care facility, nursing facility/nursing home

Graph 91. Proportion of people whose visitors are able to come at any time (if in group setting)<sup>63</sup>

<sup>63</sup> Group/adult family/foster/host home, assisted living/residential care facility, nursing facility/nursing home

Graph 92. Proportion of people who have access to food at all times of the day (if in group setting)<sup>64</sup>

<sup>64</sup> Group/adult family/foster/host home, assisted living/residential care facility, nursing facility/nursing home

## Self-Direction

People have authority and are supported to direct and manage their own services.

There is one Self-Direction indicator measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who can choose or change the kind of services they receive and who provides them.

There are three survey items that correspond to the Self-Direction domain.

Un-collapsed data are shown in Appendix B.

Graph 93. Proportion of people who can choose or change what kind of services they get

Graph 94. Proportion of people who can choose or change when and how often they get their services

Graph 95. Proportion of people who can choose or change their paid support staff if they want to

## Work

People have support to find and maintain community integrated employment if they want it.

There are five Work indicators measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who have a paid job.
2. Proportion of people who would like a job.
3. Proportion of people who receive job search assistance.
4. Proportion of people who volunteer.
5. Proportion of people who would like to volunteer.

There are five survey items that correspond to the Work domain.

Un-collapsed data are shown in Appendix B.

Graph 96. Proportion of people who have a paying job

Graph 97. Proportion of people who would like a job (if not currently employed)

Graph 98. Proportion of people wanting a job who had someone talk to them about job options

Graph 99. Proportion of people who do volunteer work

Graph 100. Proportion of people who would like to do volunteer work (if not currently volunteering)

## Everyday Living

People have enough supports for everyday living.

There is one Everyday Living indicator measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who have adequate support to perform activities of daily living and instrumental activities of daily living.

There are four survey items that correspond to the Everyday Living domain.

Un-collapsed data are shown in Appendix B.

Graph 101. Proportion of people who generally need at least some assistance with everyday activities (such as preparing meals, housework, shopping or taking their medications)

Graph 102. Proportion of people needing at least some assistance with everyday activities who always get enough of that assistance when they need it

Graph 103. Proportion of people who generally need at least some assistance with self-care (such as bathing, dressing, going to the bathroom, eating, or moving around their home)

Graph 104. Proportion of people needing at least some assistance with self-care who always get enough of that assistance when they need it

## Affordability

People have enough available resources.

There is one Affordability indicator measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who have to cut back on food because of money.

There is one survey item that corresponds to the Affordability domain.

Un-collapsed data are shown in Appendix B.

Graph 105. Proportion of people who ever have to skip a meal due to financial worries

## Control

### People feel in control of their lives

There is one Control indicator measured by the NCI-AD Adult Consumer Survey:

1. Proportion of people who feel in control of their lives.

There is one survey item that corresponds to the Control domain.

Un-collapsed data are shown in Appendix B.

Graph 106. Proportion of people who never feel in control of their lives

## Appendix A: Rules for Recoding and Collapsing Responses

Table A1 below details collapsing rules for recoding survey items with three or more response options into binary variables used for analysis. The table also specifies which graphs in this report contain recoded items, as well as their associated NCI-AD domains.

Unless otherwise stated, “Don’t Know” and “Unclear/Refused” responses are excluded.

Table A1. Outcome Variables – Collapsing Rules

Domain	Item	Graph #	Collapsing Logic
Community Participation	Proportion of people who are as active in their community as they would like to be	1	Collapse “No” and “Sometimes”
Choice and Decision Making	Proportion of people who get up and go to bed when they want to	4	Collapse “Some days, sometimes” and “No, never”
	Proportion of people who can eat their meals when they want to	5	Collapse “Some days, sometimes” and “No, never”
	Proportion of people who are able to furnish and decorate their room however they want to (if in group setting)	6	Collapse “In all ways” and “In most ways”
Relationships	Proportion of people who are always able to see or talk to friends and family when they want to (if there are friends and family who do not live with person)	7	Collapse “Most of the time, usually, or some family and/or friends” and “No, or rarely”
Satisfaction	Proportion of people who like where they are living	8	Collapse “In-between, most of the time” and “No”
	Proportion of people who would prefer to live somewhere else	9	Collapse “Yes” and “Maybe”
	Proportion of people who like how they spend their time during the day	10	Collapse “Some days, sometimes” and “No, never”
	Proportion of people whose paid support staff change too often	11	Collapse “Yes” and “Some, or sometimes”
	Proportion of people whose paid support staff do things the way they want them done	12	Collapse “Some, or usually” and “No, never or rarely”
Service Coordination	Proportion of people who know whom to contact if they want to make changes to their services	13	Collapse “Not sure, maybe” and “No”
	Proportion of people who know whom to contact if they need help with services or have a complaint	14	Collapse “Not sure, maybe” and “No”
	Proportion of people whose paid support staff show up and leave when they are supposed to	15	Collapse “Some, or usually” and “No, never or rarely”

Domain	Item	Graph #	Collapsing Logic
	Proportion of people whose long-term care services meet all their current needs and goals	18	Collapse “No, not at all” and “Some needs and goals”
	Proportion of people whose family member (paid or unpaid) is the person who helps them most often (if anyone provides support on a regular basis)	20	Collapse “Paid family member or spouse/partner” and “Unpaid family member or spouse/partner”
	Proportion of people who have a family member (paid or unpaid) providing additional assistance (if anyone provides support on a regular basis)	21	Collapse “Paid family member or spouse/partner” and “Unpaid family member or spouse/partner”
	Proportion of people who can reach their case manager/care coordinator when they need to (if know they have case manager/care coordinator)	23	Collapse “Most of the time, usually” and “No, or only sometimes”
	Proportion of people who receive information about their services in the language they prefer (if non-English)	24	Collapse “No” and “Some information”
Care Coordination	Proportion of people who felt comfortable and supported enough to go home (or where they live) after being discharged from a hospital or rehabilitation facility in the past year	26	Collapse “No” and “In-between”
	Proportion of people who know how to manage their chronic condition(s)	28	Collapse “No” and “In-between, or some conditions”
	Proportion of people with concerns about falling or being unstable	29	Collapse “Yes, often” and “Sometimes”
Access to Community	Proportion of people who have transportation when they want to do things outside of their home (non-medical)	31	Collapse “No” and “Sometimes”
	Proportion of people who have transportation to get to medical appointments when they need to	32	Collapse “No” and “Sometimes”
Access to Needed Equipment	Proportion of people who need grab bars in the bathroom or elsewhere in their home but do not have them	33	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who have grab bars in the bathroom or elsewhere in their home but need a replacement	34	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who need bathroom modifications (other than grab bars) but do not have them	35	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who have bathroom modifications (other than grab bars) but need a replacement	36	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”

Domain	Item	Graph #	Collapsing Logic
	Proportion of people who need a specialized bed but do not have it	37	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who have a specialized bed but need a replacement	38	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who need a ramp or stair lift in or outside the home but do not have it	39	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who have a ramp or stair lift in or outside the home but need a replacement	40	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who need some other home modification but do not have it	41	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who have some other home modification but need a replacement	42	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who need a walker but do not have it	43	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who have a walker but need a replacement	44	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who need a scooter but do not have it	45	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who have a scooter but need a replacement	46	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who need a wheelchair but do not have it	47	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who have a wheelchair but need a replacement	48	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who need hearing aids but do not have them	49	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who have hearing aids but need a replacement	50	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who need glasses but do not have them	51	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”

Domain	Item	Graph #	Collapsing Logic
	Proportion of people who have glasses but need a replacement	52	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who need a CPAP machine but do not have it	53	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who have a CPAP machine but need a replacement	54	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who need a personal emergency response system but do not have it	55	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who have a personal emergency response system but need a replacement	56	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who need an oxygen machine but do not have it	57	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who have an oxygen machine but need a replacement	58	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who need some other assistive device but do not have it	59	Collapse “Has one, but needs replacement”, “Has one and doesn’t need replacement”, and “Doesn’t need”
	Proportion of people who have some other assistive device but need a replacement	60	Collapse “Needs one”, “Has one and doesn’t need replacement”, and “Doesn’t need”
Health Care	Proportion of people who can get an appointment to see their primary care doctor when they need to	70	Collapse “Usually” and “No, rarely”
Wellness	Proportion of people whose health was described as poor	77	Collapse “Excellent”, “Very good”, “Good” and “Fair”
	Proportion of people whose health was described as having gotten better compared to 12 months ago	78	Collapse “Much better” and “Somewhat better”; Collapse “Much worse”, “Somewhat worse” and “About the same”
	Proportion of people who often feel sad or depressed	81	Collapse “Never, or almost never”, “Not often”, and “Sometimes”
	Proportion of people whose hearing was described as poor (with hearing aids, if wears any)	82	Collapse “Good” and “Fair”
	Proportion of people whose vision was described as poor (with glasses or contacts, if wears any)	83	Collapse “Good” and “Fair”

Domain	Item	Graph #	Collapsing Logic
	Proportion of people who have access to healthy foods if they want them	84	Collapse “No, never” and “Sometimes”
Medications	Proportion of people who understand what they take their prescription medications for	86	Collapse “No” and “In-between, or some medications”
Rights and Respect	Proportion of people whose paid support staff treat them with respect	87	Collapse “No, never or rarely” and “Some, or usually”
	Proportion of people whose permission is asked before others enter their home/room (if in group setting)	88	Collapse “Sometimes, rarely or never” and “Usually, but not always”
	Proportion of people who have enough privacy where they live (if in group setting)	90	Collapse “Sometimes, rarely or never” and “Usually, but not always”
Self-Direction of Care	Proportion of people who can choose or change what kind of services they get	93	Collapse “No” and “Sometimes, or some services”
	Proportion of people who can choose or change when and how often they get their services	94	Collapse “No” and “Sometimes, or some services”
	Proportion of people who can choose or change their paid support staff if they want to	95	Collapse “No” and “Sometimes, or some”
Work	Proportion of people who would like a job (if not currently employed)	97	Collapse “Yes” and “Maybe, not sure”
	Proportion of people who would like to do volunteer work (if not currently volunteering)	100	Collapse “Yes” and “Maybe, not sure”
Everyday Living	Proportion of people who generally need at least some assistance with everyday activities (such as preparing meals, housework, shopping or taking their medications)	101	Collapse “A lot” and “Some”
	Proportion of people who generally need at least some assistance with self-care (such as bathing, dressing, going to the bathroom, eating, or moving around their home)	103	Collapse “A lot” and “Some”
Affordability	Proportion of people who ever have to skip a meal due to financial worries	105	Collapse “Yes, often” and “Sometimes”
Control	Proportion of people who never feel in control of their lives	106	Collapse “Yes, almost always, always” and “In-between, sometimes”
